### Officers of the Association of Clinical Pathologists

President: Sir Robert Williams  
Vice-presidents: I Rannie  
CAK Bird  
President-elect: WD Linsell

Chairman of Council: AC Hunt  
Honorary Secretary: GW Pennington  
Honorary Treasurer: J Burston  
Meetings Secretary: Colin Berry

Former editors: AG Signy 1944-72 HEM Kay 1972-80

Papers should be sent in duplicate to the Editor, *Journal of Clinical Pathology*, BMA House, Tavistock Square, London WC1H 9JR. They should be in double-spaced typewriting on one side of the paper only. The name of the author with initials (or distinguishing Christian name) should be followed by the name and address of the laboratory where the work was performed. A definition of the position held by each author should be stated in a covering letter to the Editor. All papers with joint authorship should be accompanied by the signatures of all the authors. Results should not be shown as both tables and graphs.

**ACKNOWLEDGMENT** A stamped addressed postcard should be enclosed for return to the author as acknowledgment of receipt of the manuscript. Overseas authors should enclose international reply paid coupons.

**ILLUSTRATIONS** Diagrams should be drawn in Indian ink on stout white paper. The legends for illustrations should be typed on a separate sheet. Photographs and photomicrographs should be on glossy paper, unmounted.

**CHEMICAL FORMULAE** should as far as possible be written in a single horizontal line.

**ABBREVIATIONS** In general, symbols and abbreviations should be those used by the *Biochemical Journal*.

**SI UNITS** The units in which the work was done should be cited first followed by traditional units or SI units in parentheses. A conversion factor shall be given as a footnote to tables and in legends to figures. Such conversion is the responsibility of the author.

**ETHICS** The critical assessment of papers submitted will include ethical considerations.

**REFERENCES** Number references consecutively in the order in which they are first mentioned in the text. Identify references in the text by arabic numerals (in parentheses). References cited only in tables or in legends to figures should be numbered in accordance with a sequence established by the first identification in the text of the particular table or illustration. The references should be given in the form used by *Index Medicus*:

*Journal* (List all authors when six or less; when seven or more, list only first three and add *et al.*)  
Soter NA, Wassermann SI, Austen KF. Cold urticaria:

release into the circulation of histamine and eosinophil chemotactic factor of anaphylaxis during cold challenge. *N Engl J Med* 1976;294:687-90.

#### Book

Osler AG. *Complement: mechanisms and functions*. Englewood Cliffs: Prentice Hall, 1976.  
It is the responsibility of the author to ensure that references are correctly quoted.

**REPRINTS** Twenty-five reprints will be supplied free of charge and further reprints may be ordered when the proof is returned.

**NOTICE TO ADVERTISERS** Applications for advertisement space and for rates should be addressed to the Advertisement Manager, *Journal of Clinical Pathology*, BMA House, Tavistock Square, London WC1H 9JR.

**NOTICE TO SUBSCRIBERS** The *Journal of Clinical Pathology* is published monthly. From 1 January 1981 the annual subscription rates will be £40 in the UK and the Republic of Ireland and US\$95.00 in all countries overseas. Payment for overseas subscriptions should be made in US dollars, ie, US\$95.00, or in your national currency based on the prevailing exchange rate to the US dollar of that currency, payable to the British Medical Association. Orders can also be placed locally with any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, can also be sent to *British Medical Journal*, 1172 Commonwealth Avenue, Boston, Mass 02134. All enquiries, however, must be addressed to the publisher in London.) All enquiries regarding air mail rates and single copies already published should be addressed to the publisher in London.

**COPYRIGHT** © 1981 *Journal of Clinical Pathology*. This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any relaxations permitted under national copyright laws, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is not, however, required to copy abstracts of papers or of articles on condition that a full reference to the source is shown. Multiple copying of the contents of the publication without permission is always illegal.

1976;33:5-12.

Requests for reprints to: Dr DC Shanson, Division of Pathology, St Stephen's Hospital, Chelsea, London SW10 9TH.

## Reports and Bulletins prepared by the Association of Clinical Biochemists

The following reports and bulletins are published by the Association of Clinical Biochemists. They may be obtained from The Publishing Department, British Medical Journal (ACB Technical Bulletins), BMA House, Tavistock Square, London WC1H 9JR. Overseas readers should remit by British Postal or Money Order.

### SCIENTIFIC REVIEWS (price £1.00/\$2.00 each)

1 The assessment of thyroid function March 1971  
FV FLYNN and JR HOBBS

2 Renal function tests suitable for clinical practice  
January 1972 FL MITCHELL, N VEALL, and RWE WATTS

3 Biochemical tests for the assessment of fetoplacental  
function May 1975 CE WILDE and RE OAKY

4 Test of exocrine pancreatic function March 1977  
AH GOWENLOCK

5 Assay of cholinesterase in clinical chemistry March  
1979 ELSIE SILK, J KING, and MARY WHITTAKER

### TECHNICAL BULLETINS (price £1.00/\$2.00 each)

22 Bilirubin standards and the determination of bilirubin  
by manual and technicon AutoAnalyzer methods  
January 1971 BARBARA BILLING, RUTH HASLAM, and N  
WALD

23 Interchangeable cells for spectrophotometers and  
fluorimeters September 1971 SS BROWN and AH  
GOWENLOCK

24 Simple tests to detect poisons March 1972 BW  
MEADE *et al.*

25 Blood gas analysers May 1972 K DIXON

26 Kits for enzyme activity determination September  
1972 SB ROSALKI and D TARLOW

27 Assessment of pumps suitable for incorporation into  
existing continuous flow analytical systems November  
1972 A FLECK *et al.*

28 Routine clinical measurements of transferrin in  
human serum September 1973 K DIXON

29 Control materials for clinical biochemistry (5th  
edition) September 1973 JF STEVENS

30 Notes on the quality of performance of serum  
cholesterol assays September 1973 SS BROWN

31 Determination of uric acid in blood and in urine  
July 1974 RWE WATTS

32 A survey of amino acid analysers readily available in  
the United Kingdom September 1974 JE CARLYLE  
and P PURKISS

33 Definitions of some words and terms used in auto-  
mated analysis November 1974 A FLECK, R ROBINSON,  
SS BROWN, and JR HOBBS

34 Measurement of albumin in the sera of patients  
January 1975 LINDA SLATER, PM CARTER, and JR HOBBS

35 Investigation of the validity of temperature correction  
factors for serum aspartate and alanine transaminases  
March 1975 SB ROSALKI *et al.*

36 Factors influencing the assay of creatinine November  
1975 JGH COOK

37 A survey of enzyme reaction rate analysers readily  
available in the United Kingdom July 1977 RA  
SAUNDERS and RF BURNS

38 Transport of specimens for clinical chemistry an-  
alysis November 1977 P WILDING, JF ZILVA, and  
CE WILDE

39 A scheme for the evaluation of diagnostic kits May  
1978 PH LLOYD

40 A practical guide to gamma-counting in radio-  
immunoassay January 1980 CE WILDE and D OTTEWELL

41 The use of biochemical tests in the diagnosis of  
disorders of calcium metabolism July 1980 ANGELA  
FAIRNEY

## Book reviews

**Clinical Diagnosis and Management by Laboratory Methods.** 16th edn. Ed JB Henry. Vols 1 and 2. (Pp lxiii + 2107; illustrated; £40.) WB Saunders. 1979.

The editor of this two-volume work on clinical pathology has been ably assisted by two associate editors, three assistant editors, and 75 contributors.

The range of work is very wide, encompassing in six parts chemical pathology and clinical chemistry, medical microscopy and examination of other body fluids, haematology and coagulation, immunology and immunopathology, medical microbiology, and administration of the clinical laboratory. Each chapter is self-contained with a number of useful references at the end of each. While there is an element of methodology 'cook-book' descriptions of techniques are minimal. Much effort is spent in explaining the fundamentals of techniques used, in providing tabulated, factual information, and in describing the clinical use of the laboratory information acquired. In addition to chapters on conventional subjects, the reviewer enjoyed those chapters concerned with sources of variations in laboratory measurements, reference values, and administration of the clinical laboratory which, in his view, are unique contributions to laboratory manuals.

What is rather surprising in this book is the organisation of Part 2, entitled *Medical Microscopy and Examination of Other Fluids*. This includes chapters on pregnancy tests and evaluation of placental function, amniotic fluid and antenatal diagnosis, sputum, malabsorption, and cytogenetics. Todd, Sanford, and Davidsohn has been published for 70 years but perhaps it would be appropriate for the 17th edition to give up this time-hallowed category and to redistribute the chapters into their appropriate sections.

It is a credit to the editors and their contributors that such modern, well-written, and succinct accounts of problems and procedures in clinical laboratories have been compressed into such a modest space. The standard of paper, printing, and illustrations is very high. Continuous numbering of the two volumes has enabled duplication of the entire very accurate index in both volumes. It would be helpful in a later edition if the extent of the pages in the two volumes could be printed on the first page of the index.

While the composition of this book reflects the outlook and work of the clinical

pathology laboratory in North America, it is informative reading for those who work in more specialised laboratories in the UK. No doubt there are some practices described which are out of date and some omissions which would draw criticisms from specialists; nevertheless this overview of clinical pathology has little to equal it. Though this book is probably too expensive for individuals it still has its place in the hospital laboratory and hospital library.

MG RINSLER

**Fetal and Maternal Medicine.** Ed EJ Quilligan and N Kretchmer. (Pp 681; illustrated; £25.35.) John Wiley and Sons. 1980.

This book is one of several recent publications emphasising the area of perinatal medicine. While not all-inclusive, it is designed to encompass the most important aspects, focusing on those areas that have the greatest concern for the practitioner. The subjects covered in more detail are those determined by the editors to be of current clinical significance.

The book is divided into three sections: Basic concepts in perinatal medicine—including chapters on Physiological changes in pregnancy, Genetics, and Immunology; Systemic problems in perinatal medicine such as infection, drugs, teratology, and fetal distress; and Specific diseases affecting mother and child, including hypertension, erythroblastosis fetalis, low birthweight, thyroid and parathyroid disorders, and haemoglobinopathies.

Each subject is discussed by both a paediatrician and an obstetrician. There is an impressive list of American authors, all acknowledged expert practitioners in their specific fields.

The lists of references at the end of each chapter are not unduly long and include basic and key review references from both sides of the Atlantic.

This book, which is not too unwieldy in size but covers a great deal of material, will be of interest to obstetricians, paediatricians, and clinical pathologists involved in perinatal services and will be of value to medical students and nurses.

ELIZABETH A LETSKY

### Interpretation of MICs

This booklet is now available, free, from Seward Laboratory, UAC House, Blackfriars Road, London SE1 9UG, telephone 01-261-1050.

## Notices

### Fondazione Giovanni Lorenzini

The Advanced Course on monoclonal antibodies and ultrasensitive immunoassay in human diagnosis and monitoring of therapy and the 3rd International Symposium on Calcitropic Hormones: methods and clinical applications will be held in Gardone Riviera (Garda Lake, Italy) on 6-9 May 1981.

For information please contact the Organising Secretariat: Fondazione Giovanni Lorenzini, Via Monte Napoleone, 23-20121 Milan, Italy.

### First International Symposium on Minimal Invasive Cancer

This symposium, organised by the University Clinic of Obstetrics and Gynecology, Graz, will be held in Graz, Kongresshaus, 1-4 July 1981.

For information please write to the Secretariat, Interconvention, PO Box 105, A-1014 Vienna, Austria.

### International Society of Haematology

The 6th meeting of the European-African Division will take place in Athens, Greece on 30 August-4 September 1981.

Please address enquiries to the Secretariat, PO Box 52, Athens 624-A, Greece.

The 19th Congress of the International Society of Haematology (jointly with the 17th Congress of the International Society of Blood Transfusion) will take place in Budapest, Hungary, on 1-7 August 1982.

For information please write to ISH/ISBT Congress, Motesz Congress Bureau, Budapest, POB 32, H-1361, Hungary.

## Correction

Processing haematological data on a dedicated computer. Nelson *et al.* October issue, pages 926-935.

A printing transposition has occurred in this paper on pages 933 and 934.

In the section Blood Group and Antibody Data, the text on page 933 from line 15, "The need to obtain information . . ." to page 934, lines 10 and 11 ". . . stored under the patient's name on a separate file" is in the incorrect position and should follow the text under the heading Blood and Blood Product Data after the paragraph ending on page 934, line 43, viz, "do not result in any reprogramming".

# Broadsheets prepared by the Association of Clinical Pathologists

- 31 Investigation of haemorrhagic states with special reference to defects of coagulation of the blood 1961 (Revised 1967) EK BLACKBURN
- 33 The laboratory detection of abnormal haemoglobins 1961 H LEHMANN and JAM AGER (revised 1975 by H Lehmann and RG Huntsman as The laboratory detection of haemoglobinnopathies)
