## Association of Clinical Pathologists

**President:** G Slavin; **President-Elect:** PP Anthony; **Vice-Presidents:** FD Lee, J Gough  
**Honorary Officers:** WR Timperley (Chairman of Council), DM Harris, (Secretary), AC Ames (Treasurer)  
**General Secretary:** Mrs JS Turner  
**Address:** 221 Preston Road, Brighton BN1 6SA; Tel (0273) 561188; Fax (0273) 541227

## Information for Authors

**Papers should be sent in duplicate to the Editors, *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR.** They should be typewritten with double spacing on one side of the paper only. The names of the authors with initials or one forename should be followed by the name of the institution where the work was performed. An indication of the position held by each author must be given in an accompanying letter to the Editors, and this should include the signatures of all authors on papers with joint authorship. Guidelines on authorship are detailed in *J Clin Pathol* 1986;39:110. Results should not be shown as both tables and graphs, and histograms should not be used where tabular information would be more appropriate.

**ARTICLES** Papers should usually be no more than 2000 words long and should report original research of relevance to the understanding and practice of clinical pathology. They should be written in the standard format with a structured abstract. The abstract should contain the headings *Aims, Methods, Results* and *Conclusions* and be no more than 300 words long. The body of the paper should have separate sections for the introduction, the methods and the results, and the discussion. If statistics are used the methods and confidence intervals should be stated. Authors are urged to seek expert advice if in doubt. Occasional Articles have a less rigid format, being 1500–2000 words in length. They are usually invited by the editors, though unsolicited submissions will be considered. Single case reports and brief papers (such as those describing negative findings) will usually be considered only as Short Reports. The format for these is an unstructured 150 word summary, up to 1500 words of text, up to two tables or figures (or one of each) and no more than 10 references. Letters to the Editor should normally refer to previously published papers or make some point about the practice of pathology. They are not intended to be a vehicle for the presentation of new data unrelated to earlier Journal articles.

**ACKNOWLEDGMENT OF RECEIPT** A stamped addressed postcard should be enclosed for return to the author as acknowledgment of receipt of the manuscript. Overseas authors should enclose international reply paid coupons.

**ETHICS** The critical assessment of papers submitted will include ethical considerations.

**ILLUSTRATIONS** Diagrams should be reproduced photographically. The legends for illustrations should be typed with double spacing on a separate sheet. Photographs and photomicrographs must be of high quality in full tonal scale on glossy paper, and unmounted. Only salient detail should be included. Areas without tissue ("background") should be as near white as possible. The width of illustrations should be 6.7 cm, 10.2 cm, 13.7 cm or, in exceptional circumstances,

17.4 cm, to fit the column layout of the Journal. Colour reproduction is welcomed and is subsidised by the Journal; for details of costs to the author please contact the Journal office.

**ABBREVIATIONS** Abbreviations must be spelt out on first use or be accompanied by explanation in the text. The use of non-standard abbreviations and acronyms should be avoided.

Symbols and abbreviations should be in the Vancouver style.

**UNITS** All measurements should be given in SI units.

**REFERENCES** The references must be given in the Vancouver style.

**REPRINTS** These may be ordered when the proof is returned. Prices for large numbers of reprints available on request.

**NOTICE TO ADVERTISERS** Applications for advertisement space and for rates should be addressed to the Advertisement Manager, *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR.

The *Journal of Clinical Pathology* is published monthly. The annual subscription rates are £161.00; USA \$282.00. Orders should be sent to The Subscription Manager, *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR. Subscribers may pay for their subscriptions by Access, Visa, or American Express, by quoting on their order the credit or charge card preferred, together with the appropriate personal account number and expiry date of the card. Orders can also be placed with any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, may also be sent to the *British Medical Journal*, Box 560B, Kennebunkport, Maine 04046, USA. All enquiries, however, must be addressed to the publisher in London.) All enquiries regarding air mail rates and single copies already published should be addressed to the publisher in London.

**COPYRIGHT** © 1992 *Journal of Clinical Pathology*. This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any relaxations permitted under national copyright laws, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is not, however, required to copy abstracts of papers or of articles on condition that a full reference to the source is shown. Multiple copying of the contents of the publication without permission is always illegal.

ISSN 0021–9746

books on flow cytometry which have come on the market in the last few years, there are several I would purchase before this book. However if you are embarking on a PhD in this area then this book would be very valuable.

P QUIRKE

**Manual of Quantitative Pathology in Cancer Diagnosis and Prognosis.** JPA Baak (Pp 616; 192 figures; DM 350.) Springer Verlag. 1991. ISBN 3-540-51275-6.

The first book *A Manual of Morphometry in Diagnostic Pathology*, published in 1983 was found to be very useful by people involved in quantitative pathology. It was a small book, frequently borrowed, but less frequently returned.

This book has the same format and the early part of both books is very similar. The remainder of the book, however, is full of new material, providing the reader with a wealth of information. There is a complete section on techniques and equipment which will be helpful to those lacking such knowledge. Topics described include stereology, cytometry, image cytometry, flow cytometry and laser scanning microscopy. The section on image processing, although welcome, may appear too involved for those lacking specific knowledge.

The section on applications is much more comprehensive than before and is likely to be of value, irrespective of the specific interest of the reader. These items are written by experts in the respective fields. There are additional chapters to the first edition on the use of expert systems, neural nets, teaching, and more.

Occasionally there is a sense of *déjà vu* when reading a chapter which, although it has been expanded and is still relevant, reads like the first version and shares many of the figures.

There are, inevitably, occasions when readers may question some of the statements. This serves to make the book more stimulating. In addition, it is very comprehensive, highly informative, and will become as widely read as its predecessor.

C SOWTER

**Multipoint Methods in the Clinical Laboratory.** A Handbook. M Faiers, R George, J Jolly, P Wheat. (Pp 95; Paperback £6.95.) PHLS Publications. 1991. ISBN 0 901144 28 2.

Mechanisation or even automation of repetitive processes in the microbiology laboratory has much to commend it. Not least in these troubled times is the potential for reducing the unit costs of routine tests. This slim volume is an introduction to the application of multipoint technology in the diagnostic laboratory. Chapters include identification of Gram positive and Gram negative bacteria, urine testing, application of computers and antimicrobial sensitivity testing. The latter chapter occupies almost half the book, reflecting the wider experience with this particular topic. At first sight, the book appears to be a manual to allow others to proceed. Disappointingly, further reading shows that this is not the case. The book provides no more than an introduction to the subject, highlighting many of the pitfalls. The impression is given that there is far to go before potential gremlins are removed and reliable and consis-

tent results can be expected. Indeed, I gained the impression that this is best left to commercial enterprise.

The book is not well written, repetition and inconsistencies—for example, *M morgani* and *P morgani*—are irritating. The BSMT clearly has an identity crisis—is the Society “microbial” or “multipoint”?

The book is modestly priced and therefore worth a read if only to provide food for thought. There is no question that multipoint technology has an important role in reference and research work, but I was unconvinced that it is ready for widespread use in the diagnostic laboratory.

GL RIDGWAY

**Foodborne Illness—A Lancet Review.** Ed Advisers WM Waites, JP Arbuthnott. (Pp 146; £9.95.) Hodder & Stoughton. 1991. ISBN 0-340-55570-X.

The high level of public concern about food safety reflects its importance as a public health issue and is shown by constant media interest, acceptance by the government of the report of its Committee on Microbiological Safety of Food (Richmond Committee), and the passing of the Food Safety Act (1990). This timely *Lancet* review, one of a series of reviews on current themes, sets out to explain the causes and extent of foodborne illnesses and what can be done about them. The 22 contributors are international experts from the United Kingdom and North America who have written concise reviews of 17 topics which were published in the *Lancet* in 1990 and are collected together in this slim and attractive book. The foreword by the editor of the *Lancet*, Robin Fox, sets the scene and is followed by an overview of foodborne illness, descriptions of its epidemiology here and in North America, a review of sources of infection and accounts of food legislation. Next are reviews of illnesses caused by specific bacterial pathogens such as salmonellae and staphylococci, then viruses, and protozoa. The last two reviews are of natural foodborne toxicants and bovine spongiform encephalopathy. Each review is followed by a list of references. This book is a mine of information: it should be read by all microbiologists and others with an interest in foodborne diseases and represents excellent value at the price.

RN PEEL

## NOTICES

*Preliminary announcement:*

**25th Congress of the  
International Society of Hematology**

**Cancun, Mexico**

**April 17–22 1994**

*For further details contact*

The Secretariat, Blvd Diaz Ordaz 808,  
72530, Puebla, Mexico

Tel: 005222-438100

Fax: 005222-438428

### Health professions in 1992: The European Challenge

Date:

**Tuesday 28 April 1992**

Venue:

**Guildhall, London EC2P 2EJ**

Fee:

**£75.00**

*(reduced fee available to members of the  
Royal Society of Health)*

*All enquiries to:*

Conference Department,  
The Royal Society of Health,  
38A St George's Drive,  
London SW1V 4BH.

Tel: 071-630 0121 Fax: 071-976 6847

### Continuing Medical Education and Training in Europe: The Future

**October 1 and 2 1992**

**Royal College of Physicians, London**

Further information can be obtained from  
Dr MWN Nicholls or Mrs JM Coops,  
The Conference Office, c/o The Fellowship  
of Postgraduate Medicine, 6 St  
Andrew's Place, London NW1 4LB. Tel.  
(44) 071-935 5556. Fax (44) 071-224 3219.

### Association of Clinical Pathologists

#### Junior Membership

Junior membership of the Association is available to medical practitioners who have been engaged in the practice of pathology for a period of less than four years. Junior members are able to remain in this category for a maximum of six years or on the attainment of consultant status. The annual subscription is £34 for those resident in the United Kingdom and £65 for those overseas. The annual subscription may be claimed against tax.

Junior members receive the *Journal of Clinical Pathology* each month. Other benefits are reduced registration fees to attend ACP scientific meetings, all the documents regularly sent to full members of the Association including *ACP News*, which has a regular column for juniors, and the twice yearly summary of pathology courses included in the ACP programme of postgraduate education. Junior members have their own representative body, the Junior Members' Group, which has a direct input to Council.

For Junior Membership apply to: The Honorary Secretary, Association of Clinical Pathologists, 221 Preston Road, Brighton BN1 6SA. (0273) 561188.
