Information for Authors

Papers should be sent in duplicate to the Editors, *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR. Telephone numbers: 071 383 6209/6214. Fax number: 071 383 6668. They should be typewritten with double spacing on one side of the paper only. The names of the authors with initials of one forename should be followed by the name of the institution where the work was performed. An indication of the position held by each author must be given in an accompanying letter to the Editors, and this should include the signatures of all authors on papers with joint authorship. Guidelines on authorship are detailed in *J Clin Pathol* 1986;39:110. Results should not be shown as both tables and graphs, and histograms should not be used where tabular information would be more appropriate.

ARTICLES Papers should usually be no more than 2000 words long and should report original research of relevance to the understanding and practice of clinical pathology. They should be written in the standard format with a structured abstract. The abstract should contain the headings *Aims, Methods, Results and Conclusions* and be no more than 300 words long. The body of the paper should have separate sections for the introduction, the methods and the results, and the discussion. If statistics are used the methods and confidence intervals should be stated. Authors are urged to seek expert advice if in doubt. Occasional Articles have a less rigid format, being 1500-2000 words in length. They are usually invited by the editors, though unsolicited submissions will be considered. Single case reports and brief papers (such as those describing negative findings) will usually be considered only as Short Reports. The format for these is an unstructured 150 word summary, up to 1500 words of text, up to two tables or figures (or one of each) and no more than 10 references. Letters to the Editor should normally refer to previously published papers or make some point about the practice of pathology. They are not intended to be a vehicle for the presentation of new data unrelated to earlier Journal articles.

ACKNOWLEDGMENT OF RECEIPT A stamped addressed postcard should be enclosed for return to the author as acknowledgment of receipt of the manuscript. Overseas authors should enclose international reply paid coupons.

ETHICS The critical assessment of papers submitted will include ethical considerations.

ILLUSTRATIONS Diagrams should be reproduced photographically. The legends for illustrations should be typed with double spacing on a separate sheet. Photographs and photomicrographs must be of high quality in full tonal scale on glossy paper, and unmounted. Only salient detail should be included. Areas without tissue ("background") should be as near white as possible. The width of illustrations should be 6.7 cm, 10.2 cm, 13.7 cm or, in exceptional circumstances, 17.4 cm, to fit the column layout of

the Journal. Colour reproduction is welcomed and is subsidised by the Journal; for details of costs to the author please contact the Journal office.

ABBREVIATIONS Abbreviations must be spelt out on first use or be accompanied by explanation in the text. The use of non-standard abbreviations and acronyms should be avoided.

Symbols and abbreviations should be in the Vancouver style.

UNITS All measurements should be given in SI units.

REFERENCES The references must be given in the Vancouver style.

REPRINTS These may be ordered when the proof is returned. Prices for large numbers of reprints available on request.

NOTICE TO ADVERTISERS Applications for advertisement space and for rates should be addressed to the Advertisement Manager, *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR.

The *Journal of Clinical Pathology* is published monthly. The annual subscription rates are £188.00; USA \$341.00. Orders should be sent to The Subscription Manager, *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR. Subscribers may pay for their subscriptions by Access, Visa, or American Express, by quoting on their order the credit or charge card preferred, together with the appropriate personal account number and expiry date of the card. Orders can also be placed with any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, may also be sent to the *British Medical Journal*, Box 560B, Kennebunkport, Maine 04046, USA. All enquiries, however, must be addressed to the publisher in London.) All enquiries regarding air mail rates and single copies already published should be addressed to the publisher in London.

brief descriptions of geographical distribution, morphology, and life cycle.

Section 2 contains over 250 colour photographs covering a wide range of parasite morphology, pathology (including stained sections), and clinical pictures with captions on the facing page. Although the overall quality of the photographs is excellent, I was disappointed to see a lack of size markers on all but a handful. In the clinical laboratory size is of vital importance for identifying ova and cysts.

The third section contains black and white electron micrographs, radiographs, and other illustrations, separated from the colour section for reasons of economy. This does not detract from the atlas in any way, and indeed some of the scanning electron microscopic images are quite breathtaking. I would, however, like to have seen some indication of size on the photographs.

This atlas has a spacious and orderly feel to it, and I am impressed by the overall quality. Clinical microbiologists, particularly those in training, will find it useful.

AJ HAY

Atlas of Ovarian Tumors. L Deligdisch, A Altchek, CJ Cohen. (Pp 182; £94.) Igaku-Shoin. 1994. ISBN 0-89640-240-1.

This sumptuously produced atlas is subdivided into two main sections with three chapters devoted to "clinical aspects" and seven chapters allocated to "pathology". This strategy may be convenient in a multi-author text, but it has resulted in a clinical section which is pathologically naive and a pathological section impoverished by the paucity of clinicopathological correlation.

The wide-ranging introductory chapter, which covers epidemiology, genetics, molecular biology, early diagnosis, and screening for ovarian cancer, provides a useful overview of the subject, although the emphasis placed on ultrasonography is excessive. The two ensuing chapters, both rather lengthy and repetitive, are devoted to management of ovarian carcinoma and non-epithelial tumours, respectively.

The pathology section comprises four chapters devoted to primary epithelial neoplasms including a whole chapter on the interesting but controversial subject of ovarian intraepithelial neoplasia. Other chapters deal with sex cord-stromal tumours, germ cell tumours, and metastatic tumours. This section is well illustrated with adequate photomicrographs and gross photographs of excellent quality. However, many entities are skimpily and uncritically described with no attempt to evaluate the taxonomic over-enthusiasm displayed by recent authors in this field. On the other hand, many rare but well established entities are not included. An even more serious drawback for a book aimed at the practising histopathologist is the lack of consideration given to possible differential diagnoses.

In conclusion, this new atlas is unlikely to fulfil the need for a comprehensive, authoritative, and up to date reference text on ovarian neoplasms. It cannot be recommended as a bench book for the reporting room.

Postgraduate course: Current concepts in surgical pathology

November 14-18 1994

Massachusetts General Hospital,
Harvard Medical School

This course is designed for pathologists at resident and practitioner levels. It will provide an in-depth review of diagnostic surgical pathology with emphasis on morphological features, newly recognised entities, and new techniques, presented by the faculty of the Department of Pathology, Massachusetts General Hospital. Instruction will be primarily by lecture, but will also include discussion periods. Each participant will receive a comprehensive course syllabus.

The course has category 1 accreditation for about 35 hours CME credit by the American Medical Association. The fee for the course is \$785.00 (residents and fellows \$575.00).

For further information contact: Department of Continuing Education, Harvard Medical School, 25 Shattuck Street, Boston, MA 02115 USA (Tel: 0101 (617) 432 1525).

Update on Cerebrovascular Pathology

Thursday 8 December 1994 (one-day) to be held at The Royal College of Pathologists, 2 Carlton House Terrace, London SW1Y 5AF.

The meeting is open to members and non-members of the College. Further details and application forms can be obtained from the Scientific Meetings Officer, RCPATH, 2 Carlton House Terrace, London SW1Y 5AF (Tel: 071 930 5862 ext: 24/26).

Cytopathology for histopathologists Northwick Park Hospital

30 January-3 February 1995

This is an intensive course in cytopathology suitable for candidates preparing for the MRCPATH examination in histopathology, and for established histopathologists requiring revision. It is given by the Department of Cellular Pathology, Northwick Park Hospital (Dr Elizabeth A Hudson) and the Department of Cytopathology, St Mary's Hospital Medical School, University of London (Professor Dulcie Coleman).

The programme will consist of lectures, microscopy sessions, and discussions. Topics will include cytopathology of the cervix, urine, the respiratory tract, serous effusions and fine needle aspiration cytology of breast and other sites. The course is limited to 30 participants. The course fee is £300 excluding accommodation.

Applications and enquiries should be made to: Dr Elizabeth Hudson, Department of Cellular Pathology, Northwick Park Hospital, Harrow, Middlesex HA1 3UJ (Tel: 081-869 3312).

Corrections

J Clin Pathol 1994;47:205-8; Tillyer *et al.* The title of the correspondence should read "zinc protoporphyrin assays in patients with α and β thalassaemia trait." The title at present implies that zinc assays were performed which was not the case.

In paragraph 2, the second sentence should read "... not only were the drugs causing substantial interference extremely unlikely in the outpatient and general practice population we studied, ...". Paragraph 3 second sentence should read "... Paul and Brumfit's is 15 μ mol/mol haem lower."

DR ML TILLYER

Estimation of haemoglobin concentrations using spectrophotometric tests. *J Clin Pathol* 1994;47:681.

The name of the author was given incorrectly as J Larner rather than AJ Larner.

ANDREW J LARNER

J Clin Pathol 1993;46:1116-9. (Darjee R, Gibb AP. Serological Investigation into the association between *Streptococcus bovis* and colonic cancer.) The methods section refers to "NCTC10449 (*Enterococcus faecalis*), but this should read ATCC19433 (*Enterococcus faecalis*). NCTC10449 is in fact the reference number of the type strain of *S mutans*."

AP GIBB

Increased pentane and carbon disulfide in the breath of patients with schizophrenia *J Clin Pathol* 1993;46:861-4. The concentrations of pentane and carbon disulfide were reported incorrectly. All values of pentane should be multiplied $\times 50$; all values of carbon disulfide $\times 0.05$. The statistical analyses and conclusions of the paper are not affected by these corrections.

MICHAEL PHILLIPS

Chu CM, Liaw YF. Coexpression of intercellular adhesion molecules and class I major histocompatibility complex antigens on hepatocyte membrane in chronic viral hepatitis. *J Clin Pathol* 1993;46:1004-8. The correct version of fig 2D is reproduced below.
