

THE MOST ECONOMICAL HYGIENIC CONTAINERS

*for use in
Pathological
and
Bacteriological
Laboratories*

Mono containers have a hundred uses in a hospital—particularly in the pathological department. Because they are inexpensive and 'burnable' they can be destroyed after use, thus eliminating risks and saving time. The containers are waterproof with well-fitting lids, and are made in various sizes. They are already being used for specimens of sputum, faeces, biopsies, etc., and their usefulness is increasing.

Protein Standard Solution

3 ml. Ampoules

As the only reliable and reproducible standard, Armour's Protein Standard Solution offers hitherto unobtainable accuracy and economy in serum protein determination and is superior to human albumin and crystalline bovine albumin.

*Literature is
available
on request*

For use in the Determination of Protein by the Biuret Colorimetric and other similar standards.
