

# THE MOST ECONOMICAL HYGIENIC CONTAINERS

*for use in  
Pathological  
and  
Bacteriological  
Laboratories*

Mono containers have a hundred uses in a hospital—particularly in the pathological department. Because they are inexpensive and 'burnable' they can be destroyed after use, thus eliminating risks and saving time. The containers are waterproof with well-fitting lids, and are made in various sizes. They are already being used for specimens of sputum, faeces, biopsies, etc., and their usefulness is increasing.
