<i>For information and prices write to sole distributors in U.K.:</i> Kabi Pharmaceuticals Ltd. Bilton House, Uxbridge Road, Ealing, London W.5. Telephone 01-567 4717	

When Kabikinase is needed for a patient with pulmonary embolism or thrombosis we despatch supplies by the fastest transport available

But the journey of standby stock from pharmacy to ward will always be quicker

Treatment with Kabikinase within hours of the onset of serious occlusion usually prevents irreversible tissue necrosis and may often be limb-saving and life-saving. Kabikinase therapy should be commenced as soon as possible using the simplified standard dosage scheme.* No elaborate assays are necessary, but as thrombotic damage usually proceeds rapidly after occlusion it is advisable to hold in the Pharmacy standby stock for at least one patient treatment. Otherwise delivery is arranged by the swiftest transport available at the time from Kabi Pharmaceuticals Ltd. Telephone 01-567 4717.
