

Disorders of Carbohydrate Metabolism

Symposium organized by the
Chemical Pathology Sub-Committee
of the
Association of Clinical Pathologists
and held at the
Royal Society of Medicine, London
on 29-30 November 1968

Edited by
G. K. McGowan and G. Walters

Published by the *Journal of Clinical Pathology*
B.M.A. House, Tavistock Square, London WC1, England
1969

*The Journal of Clinical Pathology is published bimonthly
by the British Medical Association, from B.M.A. House,
Tavistock Square, London, It is edited by A. G. Signy.*

Index

- Alloxan and diabetes, 77
Amylopectinosis, 36
Atherosclerosis, relation of carbohydrates and fats to, 48
Autoimmunity and diabetes, 77
- Blood fructose, measurement of, 44
— galactose, measurement of, 43
— glucose, measurement of, 42
—, hormones in, measurement of, 46
Branching enzyme deficiency, 36
BUCHANAN, K. D.: Hormonal control of carbohydrate metabolism, 2
- Carbohydrate digestion and absorption, disorders of, 24
— — — —, normal, 24
— metabolism, control and integration in animals, 67
— —, — in muscle, 67
— —, — — tissues, 66
— —, — mechanisms in, clinical applications, 70
— —, disorders of, investigation of, 42
— —, dynamic tests of, 44
— —, hormonal control of, 2
— —, intermediary, 66
Carbohydrates and fats, relation to atherosclerosis, 48
Catecholamines and diabetes, 79
Cerebral oedema in diabetic ketoacidosis, 60
Cholesterol, dietary, 49
Coma, diabetic, 58
—, —, cerebral oedema in, 60
—, —, without ketosis, 61
- Debranching enzyme deficiency, 35
Dextrinosis, limit, 35
Diabetes and autoimmunity, 77
— — obesity, 78
— — pancreatic toxins, 77
— — pregnancy, 78
— — viruses, 77
—, coma without ketosis in, 61
— due to insulin deficiency, 76
—, genetic predisposition to, 79
—, hormones other than insulin in, 78
—, ketosis and coma in, 57
—, — — —, with cerebral oedema, 60
— mellitus, diagnosis of, 19
— —, hypoglycaemia in, during childhood, 51
— —, pathogenesis of, 76
Diazoxide and diabetes, 77
Diet, relation to atherosclerosis, 48
Disaccharidases of intestinal mucosa, 24
Disaccharide malabsorption, acquired, 28
— —, congenital, 25
- Fats and carbohydrates, relation to atherosclerosis, 48
Food, ingestion of, hormonal events after, 4
FROESCH, E. R.: Disorders of fructose metabolism, 7
Fructose, absorption from gut, 8
— intolerance, hereditary, clinical aspects of, 9
— —, —, diagnosis of, 11
— —, —, pathogenesis of, 10
—, measurement in blood, 44
— metabolism, disorders of, 7
— —, routes of, 7
Fructosuria, essential, 9
- Galactose, measurement in blood and urine, 43
— metabolism, disorders of, 72
Genetics and diabetes, 79
Glucagon, measurement in blood, 46
—, role in carbohydrate metabolism, 3
Glucoreceptor mechanism of pancreatic β -cell, 69
Glucose, detection and measurement in urine, 43
—, measurement in biological fluids, 42
— tolerance test, 21
— — —, intravenous, 45
— — —, oral, 44
Glucose-6-phosphate deficiency, 33
 α -Glucosidase deficiency, lysosomal, 35
Glycogen molecule, 32
— storage diseases, 32
— — —, enzyme defects in, 39
— — —, types of, 33
— synthesis and degradation, 32
Glycolysis, control in muscle, 67
Growth hormone assays, 46
— — in diabetes, 78
- HALES, C.N.: Hyperinsulinism, 13
Hormones, assay of, 2
— in control of carbohydrate metabolism, 2
—, measurement in blood, 46
Hyperglycaemia, 19
Hyperinsulinaemia, 20
Hyperinsulinism, 13
—, clinical types of, 15
—, definition of, 13
—, endogenous, 16
—, exogenous, 15
—, recognition of, 13
—, treatment of, 17
Hypoglycaemia in childhood, 51
—, neonatal, 52
— of infancy, 54
— — —, idiopathic, 54
— — —, ketotic, 55
— — —, leucine-sensitive, 55
- Insulin assays, 46
— deficiency diabetes, 76
—, role in carbohydrate metabolism, 2
Intestinal disaccharidases, 24
- KEEN, H.: The diagnosis of diabetes mellitus, 19
Ketosis, diabetic, 57
—, —, cerebral oedema in, 60
Ketotic hypoglycaemia in infancy, 55
- Lactose malabsorption, congenital, 26
Leucine-sensitive hypoglycaemia in infancy, 55
LEVIN, B.: Disorders of carbohydrate digestion and absorption, 24
Liver phosphorylase deficiency, 38
Lysosomal α -glucosidase deficiency, 35
- MACDONALD, I.: Carbohydrates, fats and atherosclerosis, 48
MAHLER, R.: Glycogen storage diseases, 32
Mannoheptulose and diabetes, 77
MARKS, V.: Practical aspects of the investigation of disorders of carbohydrate metabolism, 42
Monosaccharide malabsorption, congenital, 29
Muscle, control of glycolysis in, 67
— phosphorylase deficiency, 37
- NELIGAN, G.: Hypoglycaemia in infancy and childhood, 51
- Obesity and diabetes, 78
Oedema, cerebral, in diabetic ketoacidosis, 60
- Pancreatic β -cell: glucoreceptor mechanism, 69
— toxins and diabetes, 77
Phosphofructokinase deficiency, 39
Phosphoglucomutase deficiency, 39
Phosphorylase deficiency, liver, 38
— —, muscle, 37
Pregnancy and diabetes, 78
PYKE, D. A.: Diabetic ketosis and coma, 57
- RANDLE, P. J.: Intermediary carbohydrate metabolism, 66
- SCHWARZ, V.: Disorders of galactose metabolism, 72
Sitosterol, reduction of serum cholesterol by, 49
Starvation, hormonal changes during, 3
Steroids and diabetes, 79
Streptozotocin and diabetes, 77
Sucrose malabsorption, congenital, 27
Synalbumin, 20
- TAYLOR, K. W.: Pathogenesis of diabetes mellitus, 76
THOMPSON, R. H. S.: Chairman's Introduction to Symposium, 1
Toxins, pancreatic, and diabetes, 77
Urine, galactose in, measurement of, 43
—, glucose in, detection and measurement of, 43
Viruses and diabetes, 77
