

Edited by H. M. Zimmerman, M.D.

PROGRESS IN NEUROPATHOLOGY

VOLUME II continues in the presentation of current scientific knowledge and the latest clinical accomplishments in the field of neuropathology. The chapters focus on experimental studies with reviews of human case material, and are complemented by an abundance of high-quality photomicrographs. The contents include: Re-examination of the Pathogenesis of the Senile Plaque; The Immunopathology of Demyelinating Disorders Examined in Organotypic Cultures of Mammalian Central Nerve Tissues; Progress in the Pathology of Motor Neuron Diseases; Experimental Virus-induced Brain Tumors; The Many Facets of Neurotuberculosis; Recent Findings in Pick's Disease.

May 1973, 480 pp., illus., \$29.00
ISBN 0-8089-0775-1

VOLUME I

"Lucidly written and amply illustrated, the book is completed with a full, well-organized index. A standard of excellence for the succeeding volumes has been established by the scope and quality of the first volume." — J.A.M.A.

1971, 316 pp., 200 illus., \$24.00
ISBN 0-8089-0668-2
