

# The Cell and Cancer

---

Symposium organized by  
The Royal College of Pathologists  
delivered in London in February 1973

---

Edited by  
A. R. CURRIE

Published for The Royal College of Pathologists by the  
*Journal of Clinical Pathology*, B.M.A. House, Tavistock Square,  
London WC1H 9JR England

£2.25

*The Journal of Clinical Pathology is published monthly  
by the British Medical Association, from BMA House,  
Tavistock Square, London*

## Index

- , lymphocytic, chronic, Richter's syndrome in, 105  
—, myelocytic, chronic, histogenesis of, genetic marker studies of, 12
- LEWIS, M. G.: The role of circulating antibody in the control of metastases, 83
- Ligands, redistribution of membrane macromolecules induced by, relation to cancer, 31
- Lymphocytes and lymphomas, T (thymic) and B (bursal), 106  
—, recirculating, 72
- Lymphocytic leukaemia, chronic, Richter's syndrome in, 105
- Lymphoid cells and macrophages in syngeneic tumour immunity, 77  
— system and experimental neoplasias, 72
- Lymphomas, Burkitt, histogenesis of, genetic marker studies of, 13  
—, follicular, 104  
—, malignant, progressive spread and systematization of, 105
- Lymphoreticular system, tumours of, nomenclature, histogenesis and behaviour, 103
- Lysosomal enzymes and tumour invasiveness, 45  
— in tumour cells, 43
- Lysosomes in cancer cells, 43  
—, changes during therapy, 47
- Macrophages, 'armed' and 'activated', 77  
—, role in host resistance to tumours, 79  
—, — in 'immunotherapy' of tumours, 81  
—, — in tumour immunity, 77
- Malaria, endemic, chronic, hyperimmune state in, 91
- Malignancy, association with nephrotic syndrome, 90  
—, development of, relation of circulating antibody to, 87  
—, genetic analysis of, 17
- Melanoma, malignant, metastasis in, role of circulating antibody in control of, 83
- Metastasis and concomitant immunity, role of macrophages in, 80  
—, control of, role of circulating antibody in, 83
- Milk-specific proteins, secretion in breast cancer, 95
- Mitotic cycle and cell population control, 19
- Molecular pathology of cancer cells, 4
- Myelocytic leukaemia, chronic, histogenesis of, genetic marker studies of, 12
- Necrosis, coagulative, 35, 46
- Neoplasias. *See* Tumours
- Nephrotic syndrome, association with malignancy, 90
- NEVILLE, A. M.: Clinical value of tumour-associated antigens, 119
- Non-specific cross-reacting antigen, 117
- Nucleic acid metabolism, enzymes of, in hepatomas, 110
- Nucleus, developmental potentiality in normal and cancerous cells, 27
- Oestradiol, effect on cell membrane-polysome interaction, 54
- Oestrogen receptor activity in breast cancer, 69  
—, role in breast cancer, 66
- Oncogene hypothesis and RNA tumour viruses, 8
- PANG, L. S. C. *See* YOUNG, S., PANG, L. S. C., *et al.*
- PAUL, J., and HICKEY, I.: Molecular pathology of the cancer cell, 4
- Phenotype of cancer cells, 3  
— of cells, experimental alteration *in vivo*, 1
- Pinocytosis in tumour cells, 47
- Pituitary hormones, role in breast cancer, 66
- Polysomes, interaction with cell membranes in neoplastic cells, effect of steroid hormones and carcinogens, 51
- Progesterone, role in breast cancer, 66
- Prolactin, role in breast cancer, 66
- Proteases and detachment of tumour cells, 46  
— in control of cell growth, 48
- Protein, basic, in cancer, 120  
— metabolism, enzymes of, in hepatomas, 109  
— synthesis, abnormal, in cancer cells, 4
- Proteins, milk-specific, secretion in breast cancer, 95
- RABIN, B. R., BLYTH, C. A., DOHERTY, D., FREEDMAN, R. B., ROOBOL, A., SUNSHINE, G., and WILLIAMS, D. J.: The effects of steroid hormones and carcinogens on the interaction of membranes with polysomes, 51
- RAFF, M. C., and DE PETRIS, S.: Ligand-induced redistribution of membrane macromolecules: some possible implications for cancer, 31
- RATCLIFFE, J. G. *See* LANDON, J., RATCLIFFE, J. G., *et al.*
- 'Rearrangase' and membrane-polysome interaction in neoplastic cells, 51
- REES, L. H. *See* LANDON, J., RATCLIFFE, J. G., *et al.*
- Reticulum cell sarcoma, 103
- Ribonucleic acid. *See* RNA
- Richter's syndrome in chronic lymphocytic leukaemia, 105
- RNA abnormalities in cancer cells, 6  
— tumour viruses. *See* Leucoviruses
- ROOBOL, A. *See* RABIN, B. R., BLYTH, C. A., *et al.*
- Sarcoma, reticulum cell, 103
- SCOTT, A. P. *See* LANDON, J., RATCLIFFE, J. G., *et al.*
- Serum factor, blockage of circulating antibody against tumour cells by, 89
- Specific macrophage arming factor, 77
- Steroid hormones and carcinogens, effect on membrane-polysome interaction in neoplastic cells, 51  
—, metabolism in breast cancer, 68
- STOKER, M. G. P.: Effects of tumour viruses on cell growth, 60
- Sulphating enzymes in breast cancer, 69
- SUNSHINE, G. *See* RABIN, B. R., BLYTH, C. A., *et al.*
- Testosterone, effect on cell membrane-polysome interaction, 54
- Thymus and immune response to tumours, 72
- Transcriptase, reverse, in RNA tumour viruses, 7
- Tumour antigens and cell fusion studies, 7  
— cells, 51  
—, —, membrane-polysome interaction, effect of steroid hormones and carcinogens, 51  
— immunity, 72  
—, —, ligand-induced membrane changes in, 33  
—, —, role of macrophages in, 77  
— viruses, effect on cell growth, 60  
—, —, mechanism of action on cell growth, 62
- Tumour-associated antigens, clinical value of, 119  
—, —, in assessment of prognosis in tumours, 124  
—, —, — therapy of tumours, 124  
—, —, in diagnosis and differential diagnosis of tumours, 120  
—, —, in management of patients in follow-up phase in tumours, 123  
—, —, sources and chemical aspects, 119  
— hormonal products, 127  
—, —, ectopic, cellular and biochemical basis of, hypotheses for, 132  
—, —, —, comparison with normal hormones, 131  
—, —, —, incidence of, 130  
—, —, —, synthesis of, evidence for, 128  
— products, 115
- Tumours associated with hormonal products, classification of, 127  
—, cell death in, 40  
—, — proliferation in, 24  
—, differentiation of, 94  
—, experimental, and lymphoid system, 72  
—, histogenesis of, genetic markers as tracers of, 11  
—, histological differentiation of, relation to enzyme activity, 108  
—, 'immunotherapy' of, role of macrophages in, 81  
—, metastasis of. *See* Metastasis  
— of lymphoreticular system, nomenclature, histogenesis and behaviour, 103  
— . *See also* Cancer
- Uterine leiomyomas, histogenesis of, genetic marker studies of, 11
- Virus recovery from virus-transformed cells, and cell fusion studies, 16
- Viruses. *See* Tumour viruses
- WATKINS, J. F.: Cell hybridization and cancer, 16
- WESTON, B. J. *See* DAVIES, A. J. S., WESTON, B. J., *et al.*
- WILLIAMS, D. J. *See* RABIN, B. R., BLYTH, C. A., *et al.*
- WOODLAND, H. R.: Some studies on early embryonic development relevant to the study of cancer, 26
- WYLLIE, A. H.: Death in normal and neoplastic cells, 35
- YOUNG, S., PANG, L. S. C., and GOLDSMITH, I.: Differentiation in breast cancer, 94
