## Contents Vol. 31, No. 9, September 1978

Pathology of five Scottish deaths from pneumonic illnesses acquired in Spain due to Legionnaires' disease agent

J. F. BOYD, W. M. BUCHANAN, T. I. F. MACLEOD, R. I. SHAW DUNN, AND W. P. WEIR *pages* 809-816

Circulating immune complexes and complement levels in relation to the clinical presentation of Nigerian children with acute poststreptococcal glomerulonephritis

I. I. ONYEWOTU AND JENNY MEE *pages* 817-822

Assessment of a tissue transport-medium in preservation of tissue-fixed immunoglobulins and complement demonstrated by direct immunofluorescence

R. JONSSON, A. KRISTENSSON-AAS, AND J. KUTTI *pages* 823-826

A comparison of complement fixation, indirect immunofluorescence for viral late antigens, and anti-complement immunofluorescence tests for the detection of cytomegalovirus specific serum antibodies

P. D. GRIFFITHS, K. J. BUIE, AND R. B. HEATH *pages* 827-831

Routine use of counter-immunoelectrophoresis test for detecting antibody to hepatitis B virus core antigen

R. FREEMAN AND M. H. HAMBLING *pages* 832-836

Serological evidence of presence of HBsAg undetectable by conventional radioimmunoassay in anti-HBc positive blood donors

J. N. KATCHAKI, T. H. SIEM, AND R. BROUWER *pages* 837-839

Prevalence of pathogenic yeasts and humoral antibodies to candida in diabetic patients

F. C. ODDS, E. G. V. EVANS, M. A. R. TAYLOR, AND J. K. WALES *pages* 840-844

Food as a source of *Klebsiella* species for colonisation and infection of intensive care patients

MARK CASEWELL AND IAN PHILLIPS *pages* 845-849

R-factor mediated trimethoprim resistance: result of two three-month clinical surveys

S. G. B. AMYES, A. M. EMMERSON, AND J. T. SMITH *pages* 850-854

Use of sensitivity discs as primary antibiotic standards in MIC determination

D. J. FLOWERS *pages* 855-858

Gas liquid chromatography for detection of bacteriuria: examination for volatile acidic and neutral compounds

ELAINE BARRETT, G. LYNAM, AND SHEILA TRUSTEY *pages* 859-865

Serum elastase and its inhibitors in the blood of heavily burnt patients

M. MISKULIN, F. MOATI, A. M. ROBERT, R. MONTEIL, AND J. GUILBAUD *pages* 866-871

Radioimmunoassay of serum ferritin

W. M. DEPPE, S. M. JOUBERT, AND P. NAIDOO *pages* 872-877

A microtechnique for measuring red cell osmotic fragility of infants

RICHARD G. RYALL, ANDREW J. CHITTLEBOROUGH, AND ANNE KANE *pages* 878-882

An unstable haemoglobin, Hb Tacoma  $\beta$ 30 (B12) arg $\rightarrow$ ser, detected at birth by the demonstration of red cell inclusions

R. A. DEACON-SMITH AND J. P. LEE-POTTER *pages* 883-887

An analysis of blood specimen container leakage

S. M. LEWIS AND J. M. WARDLE *pages* 888-892

Identification of thorium dioxide in human liver cells by electron microscopic x-ray microanalysis

ARNE ØDEGAARD, EGIL M. OPHUS, AND AILEEN M. LARSEN *pages* 893-896

Multifocal histogenesis of a cystosarcoma phyllodes

R. SALM *pages* 897-903

### Technical methods

Isolation of salmonella using a standardised inoculum and a rotary plating technique

C. A. LYNTON-MOLL AND T. JOHNSON *pages* 904-906

Disposable polythene catheter: an alternative to the bronchial brushing method for cytology of bronchial secretions obtained with the fibreoptic bronchoscope

MARGARET J. COLE, J. COWIE, AND A. I. SPRIGGS *pages* 907-908

Letter to the Editor *page* 909

Book reviews *pages* 910-912
