THE APRIL 1982 ISSUE CONTAINS THE FOLLOWING PAPERS

Monoclonal antibodies in oncology K SIKORA

Mouse red cell rosette formation and the colchicine sensitivity test: relative usefulness in the differential diagnosis of chronic lymphocytic leukaemia and B lymphocytic lymphoma PENELOPE J SUGDEN, JS LILLEYMAN

Circulating immune complexes and complement concentrations in patients with alcoholic liver disease C GLUUD, H JANS

Protein contents and binding modes of immunoglobulin-amylase complexes H OHTANI, K SAKAGUCHI, M SAITO

Synovial fluid lactic acid measurement in the diagnosis and management of septic arthritis T RIORDAN, D DOYLE, SOAD TABAQCHALI

Incidence of hypercalcaemia and primary hyperparathyroidism in relation to the biochemical profile JS HARROP, JE BAILEY, JS WOODHEAD

Biochemical assessment of histochemical methods for oestrogen receptor localisation JCE UNDERWOOD, E SHER, M REED, JA EISMAN, TJ MARTIN

Macroscopic enzyme histochemistry in myocardial infarction: artefactual nature of the creatine phosphokinase reaction NW DERIAS, CWM ADAMS

Macroscopic enzyme histochemistry in myocardial infarction: use of coenzyme, cyanide, and phenazine methosulphate NW DERIAS, CWM ADAMS

Accuracy of morphological diagnosis of lung cancer in a department of respiratory medicine MD CLEE, HELEN LD DUGUID, DJM SINCLAIR

Bilateral gonadoblastoma/dysgerminoma in a 46 XY individual: case report with hormonal studies RA FISHER, R SALM, RW SPENCER

Combined light and electron microscope in routine histopathology S JONES, SK CHAPMAN, PR CROCKER, GINA CARSON, DA LEVISON

Use of orcein in detecting hepatitis B antigen in paraffin sections of liver P KIRKPATRICK

Polyvalent heat-killed antigen for the diagnosis of infection with *Legionella pneumophila* RJ FALLON, WH ABRAHAM

Serological characterisation of *Ureaplasma urealyticum* strains by enzyme-linked immunosorbent assay (ELISA) H TURUNEN, P LEINIKKI, ELLI JANSSON

A microcomputer system for the collection and analysis of antibiotic sensitivity test data DMCG CLARKSON, KL THOMAS, G WYNNE-WILLIAMS

Comparative epidemiology of gentamicin-resistant enterobacteria: persistence of carriage and infection CA HART, MARJORIE F GIBSON

Evaluation of Fastidious Anaerobe Broth as a blood culture medium LEELA A GANGULI, LJ TURTON, GS TILLOTSON

A selective medium for isolating *Campylobacter jejuni/coli* FJ BOLTON, L ROBERTSON

Technical methods

An evaluation of the API-20 STREP system GS TILLOTSON

Use of FITC-protein A in place of fluorescein-conjugated anti-gammaglobulins for rapid virus diagnosis by immunofluorescence DJ WOOD, G CORBITT

Book reviews

Multiple Choice Questions on Clinical Chemistry. LG Whitby and AF Smith. (Pp 91; paperback £2.80.) Blackwell Scientific Publications. 1981.

Multiple choice questions to accompany "Lecture Note" text books are now the vogue. This collection has in addition helpful advice on how to answer them in different situations from examination conditions to self-assessment. The questions are aimed at medical students and young postgraduates in Clinical Chemistry, but could be found useful by medical laboratory scientific officers. Users are invited to inform the authors of any difficulties in the understanding of the questions or the correctness of the answers—a challenge to the more experienced.

The presentation of the questions is such that they can be used without the authors' *Lecture Notes in Clinical Chemistry*, but purchase of the two can only bring added benefit.

BRENDA SLAVIN

Histopathology of Non-Hodgkin's Lymphomas. K Lennert in collaboration with H Stein. (Pp 135; 68 figures; DM 78, US\$37.20.) Springer-Verlag. 1981.

Although widely used throughout Europe the Kiel classification of the non-Hodgkin's lymphomas is less familiar to British and American pathologists. This modestly priced synopsis of Professor Lennert's larger volume may well change this situation. Intended as a handy guide to lymphoma diagnosis it succeeds well for it is orderly, readable, and admirably succinct. The sections containing practical diagnostic tips, the scientific background to the Kiel system, and technical methods important in cell identification are of particular interest, and there is a lively discussion comparing the merits of the different classifications in current use. The reliance upon Giemsa staining may have previously restricted acceptance of the Kiel system in this country; nonetheless the illustrations are good and many are in black and white which not only aids clarity but ensures applicability regardless of the staining methods employed.

This excellently presented book will

most assuredly find an indispensable role in the education of any serious student of the malignant lymphomas.
