Foreword HB GOODALL *page 937*

British postgraduate training in pathology JR TIGHE *page 940*

The HLA system: structure and function WF BODMER *page 948*

Molecular pathology of single gene disorders DJ WEATHERALL *page 959*

Haemophilia A: carrier detection and prenatal diagnosis by linkage analysis using DNA polymorphism EGD TUDDENHAM, ELEANOR GOLDMAN, A MCGRAW, PBA KERNOFF *page 971*

Megaloblastic anaemia, cobalamin, and folate I CHANARIN *page 978*

Prospects for cure in leukaemia JM GOLDMAN *page 985*

Histopathology and immunohistochemistry of peripheral T cell lymphomas: a proposal for their classification T SUCHI, K LENNERT, L-Y TU, M KIKUCHI, E SATO, AG STANSFELD, AC FELLER *page 995*

Reporting colorectal cancer JR JASS, BC MORSON *page 1016*

Some aspects of neuroendocrine pathology JULIA M POLAK, SR BLOOM *page 1024*

The role of immunocytochemistry in diagnostic pathology DY MASON, KC GATTER *page 1042*

Cellular oncogens in neoplasia VTW CHAN, JO'D MCGEE *page 1055*

Retroviruses and human disease RA WEISS *page 1064*

Automation in clinical microbiology: a new approach to identifying micro-organisms by automated pattern matching of proteins labelled with ³⁵S-methionine SOAD TABAQCHALI, R SILMAN, DIANE HOLLAND *page 1070*

Neisseria gonorrhoeae: a versatile pathogen CSF EASMON, CA ISON *page 1088*

Effects of catecholamines on secretion of adrenocorticotrophic hormone (ACTH) in man SAL-DAMLUJI, LH REES *page 1098*

Interpretation of the metabolic effects of trauma and sepsis HB STONER *page 1108*

Plasma lipid concentrations: the concept of "normality" and its implications for detection of high cardiovascular risk BLEWIS *page 1118*

Clinical biochemistry of the neonatal period: immaturity, hypoxia, and metabolic disease RA HARKNESS *page 1128*

The next twenty five years RB GOUDIE *page 1145*
