

Occasional articles

Presidential Address: Crystal ball gazing and the effects of fate *GW Pennington*

Statistics on microcomputers. 2 Confidence intervals and significance tests *RA Brown, J Swanson Beck*

Papers

Mixed lymphocyte reactions do not predict severity of graft versus host disease (GVHD) in HLA-DR compatible, sibling bone marrow transplants *SH Lim, WN Patton, S Jobson, et al.*

In vivo oxidation of the methyl group of hepatic 5-methyltetrahydrofolate
M Lumb, I Chanarin, R Deacon, et al.

Leukotriene B₄ synthesis and neutrophil chemotaxis in chronic granulocytic leukaemia
Irene AG Reilly, HR Knapp, GA Fitzgerald

Red cell hypoplasia, thrombocytosis, and leucocytosis: myelodysplastic and proliferative syndrome
A Craig, CG Geary, EM Love, et al.

Demonstration of aluminium in iliac bone: correlation between aluminon and solochrome azurine staining techniques with data on flameless absorption spectrophotometry *HA Ellis, MMC Pang, WHB Mawhinney, et al.*

Measurement of protein HC (α_2 microglobulin) and protein HC-IgA complex in different body fluids
JL Fernández-Luna, F Leyva-Cobián, E Méndez

Brush cytology of the colon and rectum in ulcerative colitis: an aid to cancer diagnosis
DM Melville, PI Richman, NA Shepherd, et al.

Use of endoscopic biopsy for diagnosing congestive gastropathy *CM Corbishley, SH Saverymuttu, JD Maxwell*

HMFG-2 as a prognostic indicator in superficial bladder cancer *IG Conn, J Crocker, LA Emtage, et al.*

Anatomical variations in human carotid bodies *Q Khan, D Heath, P Smith*

Nucleolar organising regions in cervical intraepithelial neoplasia *DC Rowlands*

Laboratory techniques

Guidelines on selection of laboratory tests for monitoring the acute phase response
International Committee for Standardization in Haematology (Expert Panel on Blood Rheology)

Automated measurement of plasma viscosity by capillary viscometer *BM Cooke, J Stuart*

Sensitive avidin biotin based technique for identifying liver membrane antigens in tissue sections
J Sipos, BM McFarlane, R Williams, et al.

Evaluation of five commercial kits to detect dsDNA antibodies *SA McMillan, Anne C Fay*

Clinical laboratory environmental contamination: use of a fluorescence/bacterial tracer
DA Kennedy, JF Stevens, AN Horn

Enzyme linked immunosorbent assay (ELISA) for cytomegalovirus antibody in donor plasma
S Ramskill, P Senior, P Barlow, et al.

Accurate automated leucocyte differential counts despite profound leucopenia *Sally E Kinsey, MJ Watts*

TOXBASE: a microcomputer database for post mortem toxicology *K Robinson, I Marsh, ARW Forrest*

Letters to the Editor

Severe aplastic anaemia after parvovirus infection in the absence of underlying haemolytic anaemia
MD Hamon, AC Newland, MJ Anderson

HIV detection by DNA amplification *GR Taylor*

Urinary bladder fungus ball *KM Morton, AJ Robertson, J McIntyre*

Effect of oral microflora on interpreting hydrogen breath test *NY Haboubi, R Sinharay, PR Hudson, et al.*

Immune complexes in the choroid plexus in systemic hypertension *JEH Pittella, EA Bambirra*

Increased red cell volume distribution width in patients with bone marrow metastases
B Seitanides, G Giakoumakis, C Tsakona
