Guarding the Guardians: Research on

EDITORIAL PEER REVIEW

Following the success of the American Medical Association's First International Congress on Peer Review in Biomedical Publication, a second such Congress is being planned for September 1993. We aim to present original research on critical issues in the publication of all clinical and scientific research.

What are such critical issues?

- The mechanisms of peer review and editorial decision making in different journals
- The relationships between authors, editors, and reviewers, and how each is educated, selected, and evaluated.
- Allocation of responsibility for published material
- Quality assurance
- Breakdowns, weaknesses, and biases
