

BMA PROFESSIONAL DIVISION PUBLICATIONS

A Code of Practice for the Safe Use and Disposal of Sharps

Essential reading for all medical practitioners, students and nursing staff, this code of practice provides a single source of advice on the relative risks of sharps at different points of use from handling to disposal, and offers concrete advice on ways in which to prevent sharps injuries. The report also sets out proposals for improving standards of education for all health care staff.

UK £4.95/Abroad £5.95 (BMA members £4.25 or £5.25)

A Code of Practice for the Sterilisation of Instruments and Control of Cross Infection

This report gives clear guidance on sterilisation procedures, including pre-cleaning and hand washing, methods of decontamination, protective clothing, clinical waste, staff training and maintenance of equipment. There is also a useful reference and resource section.

UK £4.95/Abroad £5.95 (BMA members £4.25 or £5.25)

Available to BMA members only:

The BMA Guide to Living with Risk

Winner of the Science Book Prize, 1988

This Guide illuminates the dangers of diet, alcohol and smoking; hazards at work and play, in the home and while travelling; the perils of energy production, chemicals, natural disasters... and even medical treatment. It also discusses our perception of risk, how to determine acceptable levels and how potential perils can be measured, managed and minimized.

UK £4.99/Abroad £5.99

Infection Control

The BMA has produced this book because infection is something which everyone wishes to avoid. With its wealth of data, vivid graphics and authoritative text, this guide should be necessary reading for all those involved in infection control, particularly students and teachers, nurses, doctors and other health care professionals, food producers, environmental health officers and scientists.

UK £8.95/Abroad £10.95

NHS Breast Screening Programme:

Histology & Cytology of non-palpable mammographic lesions and localisation technique

17th and 18th June 1992

Two separate but related courses to be held on two consecutive days, designed so that participants may choose to attend either or both days.

Histopathology & Cytology of Breast Screening including technique

23rd September 1992

Designed for trainee pathologists, senior pathology technicians and pathologists involved in breast screening.

Active workshop sessions for all courses are planned under the guidance of Dr M Cook and Dr G McKee based at the Royal Surrey & St Luke's Hospital Trust, Guildford.

For further information contact:

Mrs M. Cameron, Training Co-ordinator,
Jarvis Screening Centre, Stoughton Road,
Guildford. GU1 1LJ. Tel: 0483 571821

Journal of Medical Ethics

Journal of the Institute of Medical Ethics

EDITOR: RAANAN GILLON

THE JOURNAL OF MEDICAL ETHICS

is a leading international journal in the field of medical ethics. It publishes interdisciplinary articles on ethical aspects of health care. Contributions to the journal originate in many countries and disciplines, and all undergo rigorous assessment. In addition to publishing original articles it provides a forum for reasoned debate on ethical issues. Case conferences, editorials, book reviews, correspondence and news and notes are also included. Occasional series focus on teaching medical ethics, experiences of medico-moral dilemmas ("At the Coalface") and medical ethics in literature.

RECENT AND FORTHCOMING ARTICLES:

- **The reversibility of death**
David Cole with a reply from David Lamb
- **Debate-Involving patients in do not resuscitate decisions**
Erich Loewy
- **Telling the truth**
Jennifer Jackson
- **Literature and medicine**
Robin Downie
- **Cost effectiveness analysis. Is it ethical?**
Alan Williams
- **Paying for health**
Sir Douglas Black

Annual Subscription 1992:

You don't know everything

HOW TO DO IT: 3

Organise a new department
house officer
Organise a multicentre trial
annual report
Be a GP locum
nostic service
summary
in general practice
for charitable status
word processor
department
officer
Get publicity
organise a multicentre trial
GP locum
Write a practice annual report
Dictate a discharge summary
Develop a diabetic clinic
How to appear on television
Apply for a research grant
Deal with a publisher
Plan a research project
Chair a committee
Be a dictator
Take an examination
Organise an international paper
Choose a computer
Improve a student medical journal
Interviewed
Survive as an examiner
Construct an audit
Attend an inquest
examination
on television
research grant
with a publisher
Plan a research project

But often in a medical career it seems as if you are expected to. When confronted with a problem you've never met before the only thing to do is to ask the experts—but where are the experts who are never on holiday, never off sick, in a meeting, or simply unavailable? In *How To Do It: 3*, that's where. You can keep them in your pocket, and in a few minutes they can tell you, among many other things, how to:

- lecture overseas
- be a manager
- prepare a Festschrift
- commission a portrait
- write a practice annual report
- organise multicentre trials
- start a DNA diagnostic service
- survive a dinner

Two companion volumes of essential know-how are also available

Price (each book): Inland £6.95; Abroad £9.00
BMA members: Inland £6.45; Abroad £8.50

How is no longer a problem — but there's still which and why

The microcomputer revolution has made powerful machines and highly complex programs generally available. This means that users of statistical techniques need no longer be concerned with the arithmetical and algebraic details — the software will take care of all that. What is vital, however, is to understand the ideas and the basic principles of statistical analysis. In *Medical Statistics on Microcomputers* R A Brown and J Swanson Beck show how to get the best use out of microcomputers when analysing data, particularly in the pathology laboratory. They explain the rational basis of various widely applicable statistical methods and also indicate their limitations so that you can make an informed choice. Chapters include:

- Data handling
- Analysis of data from one or two groups
- Comparison of several groups
- Analysis of categorical data
- Statistical methods for diagnostic tests.

Let the BMJ guide you through statistics:

STATISTICS WITH CONFIDENCE — Confidence intervals and statistical guidelines. Martin J Gardner, Douglas G Altman.

Many medical journals, including the *British Medical Journal*, now expect scientific papers submitted to them to contain confidence intervals when appropriate. Why? what are they? and how do you calculate them? *Statistics With Confidence* tells you. A clear explanation of the reasons for using confidence intervals is followed by detailed presentation of methods of calculation, including numerous worked examples and specially compiled tables. To make things even easier, a computer programme, Confidence Interval Analysis (CIA), for calculating confidence intervals, has been specially designed by Martin Gardner and details are available from the Publishing Department, *British Medical Journal* (or the American College of Physicians).

UK £8.95; Abroad £10.50; US\$24.00 BMA members £8.45 or £10.00 ACP members US\$19.00

STATISTICS AT SQUARE ONE — T D V Swinscow

The statistical testing of data is indispensable in many types of medical investigation and a help on countless occasions in clinical practice. This book provides step by step instruction. Subjects covered include standard deviation, χ^2 tests, t tests, non-parametric tests, and correlation. The book includes sections on Fisher's exact probability test and rank correlation. Methods specially adapted to pocket calculators.

UK £3.95; Abroad £5.00; US\$13.00 BMA members £3.45 or £4.50 ACP members US\$11.00

STATISTICS IN PRACTICE — Sheila M Gore, Douglas G Altman

No doctor can afford to ignore statistics: most modern medical research uses statistics. This important and authoritative book provides clear information on designing studies, applying statistical techniques, and interpreting studies that use statistics. It can be easily understood by those with no statistical training and should be read by all those who want to keep abreast of new developments.

UK £8.95; Abroad £11.00; US\$23.00 BMA members £7.95 or £10.00 ACP members US\$19.00

EPIDEMIOLOGY FOR THE UNINITIATED — Geoffrey Rose, D J P Barker

Epidemiology has its own techniques of data collection and interpretation and its necessary jargon of technical terms, and in *Epidemiology For The Uninitiated* the authors guide the novice expertly through the theory and practical pitfalls. The second edition of this popular *BMJ* handbook has been revised to include further details of epidemiological methods and some of their more dramatic applications, such as the investigations on the Spanish cooking oil epidemic, and AIDS.

UK £4.95; Abroad £6.00; US\$14.00 BMA members £4.45 or £5.50 ACP members US\$12.00
