Royal Postgraduate Medical School

(University of London)

Diagnostic Liver and Gastrointestinal Pathology
26th–31st October 1992

A week long course in the histopathology of the liver and luminal gastrointestinal tract, designed for pathologists and gastroenterologists. The course will consist of lectures, demonstrations and practical microscopy sessions.

All major problems will be covered, including:

The interpretation of gastric, small intestinal and colonic biopsies; neoplasms of the stomach and colon; coeliac disease; lymphomas; inflammatory bowel disease; interpretation of liver biopsies; viral diseases; liver tumours; vascular lesions; transplantation liver biopsies; chronic active liver diseases; toxic liver damage; AIDS.

Course teachers include:

Professor D Levison	Guy's Medical School, London
Dr B Portmann	Kings College Hospital, London
Dr G Millward-Sadler	Southampton General Hospital
Dr D Wight	Addenbrook's Hospital, Cambridge
Dr M Shepherd	Gloucestershire Royal Hospital
Dr R Goldin	St. Mary's Hospital, London
Dr A Price	Northwick Park Hospital, Harrow
Dr C S Foster	Royal Postgraduate Medical School
Professor N A Wright	Royal Postgraduate Medical School

Course organiser: Dr C S Foster

Course fee (inc. catering): £330.00

Application forms from: Wolfson Conference Centre
Royal Postgraduate Medical School
Hammersmith Hospital
Du Cane Road
London W12 0NN

Telephone: 081 740 3117/3245
Fax: 081 740 4950

This course now receives full US-CME accreditation

How is no longer a problem — but there's still which and why

The microcomputer revolution has made powerful machines and highly complex programs generally available. This means that users of statistical techniques need no longer be concerned with the arithmetical and algebraic details — the software will take care of all that. What is vital, however, is to understand the ideas and the basic principles of statistical analysis. In *Medical Statistics on Microcomputers* R A Brown and J Swanson Beck show how to get the best use out of microcomputers when analysing data, particularly in the pathology laboratory. They explain the rational basis of various widely applicable statistical methods and also indicate their limitations so that you can make an informed choice. Chapters include:

- Data handling
- Analysis of data from one or two groups
- Comparison of several groups
- Analysis of categorical data
- Statistical methods for diagnostic tests.

UK £8.95; Abroad £10.50
BMA members: £8.45 or £10.00
including postage by air abroad

Available from: BRITISH MEDICAL JOURNAL, PO BOX 295, LONDON WC1H 9TE, any leading bookseller or the BMJ/BMA bookshop in BMA House.

Please enclose payment with order, or send us full details of your MASTERCARD, VISA or AMERICAN EXPRESS credit card.

CIA software—well written and “user-friendly”

Confidence Interval Analysis (CIA) is a computer program that takes the sweat out of calculating confidence intervals. Devised by Martin Gardner, professor of medical statistics, MRC Environmental Epidemiology Unit, University of Southampton. The program is menu driven with easy access to each chapter and to the method required within each chapter. Topics covered include calculating confidence intervals for:

- means and their differences
- proportions and their differences
- regression and correlation
- relative risks and odds ratios
- survival analyses
- non-parametric analyses

For each method relevant intermediate statistics and the required confidence interval are produced on the screen. Complete with its own manual, the program may also be used in conjunction with the book *Statistics with Confidence* (see below), which provides numerous worked examples. The software is available for IBM compatibles on either a 5¼" or a 3½" disk.

“... well written, “user-friendly” ... an invaluable companion to the book and recommended highly.”

British Journal of Anaesthesia

“... highly recommended to doctors (and statisticians). *CIA* ... will save a lot of time and pain.”

British Medical Journal

“... an efficient and precisely focused piece of software.”

Applied Statistics

Price: £65.00. Educational establishments, research institutes, and the NHS—£45.95. Prices include VAT in the UK and air mail despatch abroad.

Over 10,000 copies sold worldwide

“... a welcome addition to the bookshelves ... as it is very practical in its approach ...”

The Pharmaceutical Journal

“The great value of this book is that it presents, in an easily understood form, the methods which will be needed in most situations.”

Journal of Epidemiology and Community Health

“... I found this book admirably suited to its purpose.”

Clinical Practice and Physiological Measurement

“This book is strongly recommended for all those who are involved in medical research and the preparation of papers for publication.”

The Medical Journal of Australia

UK £8.95; Abroad £10.50 (BMA members £8.45 or £10.00) including postage, by air abroad

"These volumes provide a useful guide to the wide ranging problems physicians have to cope with in their daily practice. They will prove an instructive and easy-to-read reference tool for all those involved with patient management, hospital organisation and research."
International Surgery

The reviewers say . . .

HOW TO DO IT: 1

" . . . an excellent little book." *American Journal of Dermatology*

"Every contribution contains something of interest." *New Zealand Medical Journal*

" . . . equally suitable for medical student and consultant." *Journal of the Royal Naval Medical Service*

HOW TO DO IT: 2

" . . . contains a wealth of useful information and advice which the experienced contributors have gleaned from long professional experience."
British Dental Journal

" . . . a useful and informative book . . ." *Medical Journal of Australia*

" . . . this book is excellent value and should be considered a vital resource for all doctors . . ." *Holistic Medicine*

HOW TO DO IT: 3

"I cannot think of any book that provides better value than this interesting volume for the modern doctor." *Update*

"All articles are clearly presented, informative and written in a relaxed often humorous style." *Scottish Medical Journal*

"The style of writing is eminently readable and the information is delivered in a reader-friendly style." *SAMJ*

Price (each book): UK £7.95; Abroad £9.50 (BMA members £7.45 or £9.00)

The future is bright

"Many articles are neither read nor cited; indeed many articles are poor. In general many journals seem to be of little practical help to clinicians facing problems at the bedside."

"... in the course of a year at least half the journals on the shelves are never looked at at all."

"Most editors... are 'half nun, half whore.'"

"... in the 300 years of their existence journals have done little to examine their own practices."

"What are editors?"

"If an editor does not please himself, he used to say, 'he will not please anybody.'"

"Defensive editing we do not need."

"Medical journals in developing countries are, with very few exceptions, unattractive."

"I believe that the future for general medical journals—particularly those published in English—is bright. They will undoubtedly change, but they will not disappear."

The debate was lively and the opinions conflicting and forcefully expressed when, to mark its 150 year past, the *BMJ* decided to join with other general medical journals in examining their perhaps not too certain future. At a conference at Leeds Castle editors of major general medical journals throughout the world, with experts in information science, sociology, and epidemiology, discussed the functions and effectiveness of modern journals, and debated possible choices for development. Edited by Stephen Lock, *The Future of Medical Journals* is a unique compilation of papers on this important but little analysed aspect of medical science.

September 1991

UK £14.95; Abroad £17.50 (BMA members £13.95 or £16.50)

Peer review is one of the key processes at several stages of scientific research, applications for a research grant, assessing an abstract of a contribution submitted to a meeting of a scientific society, and refereeing a paper for publication in a journal. Without publication, which entails such preliminary validation (continued afterwards by the journal's general and specialist readers), science cannot advance. And ensuring that peer review is as accurate, fair, and quick as possible is one of the principal tasks of most scientific editors.

Third impression 1991 (with new introduction)

UK £12.95; Abroad £15.50 (BMA members £11.95 or £14.50)
