

## AUDIT IN ACTION

From a minority interest to an integral part of good medical practice, audit has come a long way. *Audit in Action* traces this development in a selection of articles originally published in the *BMJ*. Topics range from practical aspects of starting to audit to the wider aspects of achieving quality based on experience in the United States and Europe. The contributors are leaders in or experienced practitioners of audit. Covering audit both in hospitals and in general practice, *Audit in Action* is valuable reading for all those concerned to improve the quality of health care.

ISBN 0 7279 0317 9 260 pages 1992

UK £10.95; Overseas £13.00 (BMA members £9.95; £12.00)

Available from: BMJ Publishing Group, PO Box 295, London WC1H 9TE (tel: 071 383 6185 6245).

Also available from major medical booksellers including the BMJ bookshop in BMA House.

EST OF SCOTLAND COMMITTEE FOR POSTGRADUATE MEDICAL EDUCATION

### AN INTEGRATED COURSE WITH SELF-ASSESSMENT WORKSHOPS ON HISTOPATHOLOGY OF THE SKIN 3rd - 7th APRIL 1995 UNIVERSITY OF GLASGOW

The Course is designed to meet the needs of both pathologists and dermatologists with an interest in dermatopathology. Both newcomers to the field and those with considerable experience of skin pathology will find the course of value. In view of the new qualification of the Diploma of Dermatopathology, offered by the Royal College of Pathologists, lecturers on the course will give particular attention to areas of relevance to those interested in obtaining this qualification.

The Course, which is organised by Professor R M MacKie and Dr M Fallowfield, is divided into three sections — lecture discussions, individual microscopy sessions and projection sessions, at which material submitted by those attending the course will be demonstrated and discussed.

The syllabus covered includes the structure of normal skin, congenital skin disease, inflammatory dermatoses, granulomata and viral disease, cutaneous reticuloses, skin tumours, bullous diseases and connective tissue problems including vasculitis.

A feature of the Course is a series of self-assessment slide sets which are made available daily and discussed at projection sessions. This is designed to appeal particularly to the more experienced dermatopathologists.

Accommodation will be available in a University Hall of Residence.

**The Course Fee is £250**

Numbers are restricted and early application is advised.  
Further information and application forms are available from:  
Mrs W E Scott, Administrative Assistant,  
West of Scotland Committee for Postgraduate Medical Education,

## FROM DOYMA PUBLICATIONS...

### Autoimmune Connective Tissue Diseases

M A Kamashta, J Font, G R V Hughes

This review of the key facts in the etiology, pathophysiology, clinical aspects and therapy of the major connective tissue diseases will provide the clinician with a genuinely up to date reference base in this rapidly advancing subject.

**Contents include:** Immunogenetics of the connective tissue diseases; Interleukins and arthritis; Rheumatoid arthritis; Sjögren's syndrome; Systemic lupus erythematosus; Overlap syndromes; The vasculitides; classification, diagnosis and pathogenesis; Connective tissue diseases and the skin; Ophthalmologic manifestations in the connective tissue diseases; Treatment of connective tissue diseases in the 90's.

ISBN 84 7592 513 8 266 pages 1993 UK £56.00; Overseas £63.00 (BMA members £53.00, £60.00)

LAUNCH IN

FEB  
95

In February 1995 ..... will be launched as a new bimonthly edition of the ..... Drawing together in one publication basic molecular research and new molecular techniques relevant to diagnostic pathologists, ..... is the first of its type in Europe. It will appeal not only to diagnostic pathologists but to cell biologists, cell physiologists, immunologists and molecular geneticists.

This new edition will include original articles of molecular studies on human material relating to pathogenesis and disease processes, expert reviews, brief communications and correspondence. The content will be wide ranging - for example, including biochemistry and cell biology as well as molecular genetics - and international, reflecting the experience of the international editorial board.

Provide an international forum for those working in different areas of molecular biology.

Facilitate rapid communication of research findings across disciplines.

Make molecular research findings and molecular techniques readily accessible to diagnostic pathologists.

Ensure immediate coverage of published articles by indexing services.

Papers should be submitted to The Editors, Clinical Molecular Pathology, Dept of Histopathology, Birmingham Heartlands Hospital, Bordesley Green East, Birmingham B9 5SS United Kingdom.

Instructions to Authors may be obtained by returning the form below. Scientific papers should conform to the Vancouver style and must include a structured abstract.

## ORDER FORM

### CLINICAL MOLECULAR PATHOLOGY

Publication: Bimonthly edition of *Journal of Clinical Pathology*  
1995 Subscription Rate:  
*Journal of Clinical Pathology* and *Clinical Molecular Pathology* joint institutional rate £265, personal rate £140  
*Clinical Molecular Pathology* personal rate only: £80

### Recent Publications

143 Detection of autoantibodies to neutrophil cytoplasmic antigens 1994 R J LOCK

142 Measurement of carbon monoxide and cyanide in blood 1993 R W MAYES

### *Other Broadsheets are still available for purchase*

141 Role of endocrine biochemistry laboratories in the investigation of infertility 1993 G H BEASTALL

140 Techniques in pulmonary cytopathology 1993 J A YOUNG

139 Post mortem techniques in the evaluation of neck injury 1993 P VANEZIS

138 Gross examination of uterine specimens 1993 J SCURRY, K PATEL, M WELLS

137 Obtaining samples at post mortem examination for toxicological and biochemical analyses 1993 A R W FORREST

136 Detection and importance of anticardiolipin antibodies 1993 M A KHAMASHTA, G R V HUGHES

135 Isolation and identification methods for *Escherichia coli* and other Vero cytotoxin producing strains 1993 H R SMITH, M SCOTLAND

134 How to harvest bone marrow for transplantation 1992 R JONES, A K BURNETT

133 Gross examination of the stomach 1992 N SCOTT, P QUIRKE, M F DIXON

132 Gross examination of the large intestine 1992 J P SHEFFIELD, I C TALBOT

131 Hirsute women: Should they be investigated? 1991 J H BARTH

130 Gross examination of bladder specimens 1991 M C PARKINSON, C FISHER

129 Isolation and identification of *Listeria monocytogenes* 1991 K G KERR, R W LACEY

128 Laboratory methods for diagnosing cryptosporidiosis 1991 D P CASEMORE

127 Measurement of catecholamines and their metabolites in urine 1991 C WEINKOVE

126 Examination of specimens of the larynx 1990 L MICHAELS

125 Bacteriological diagnosis of diphtheria 1990 K BROOKS, D H M JOYNSON

124 Examination of faeces for bacterial pathogens 1990 S J PEDLER, K E ORR

*Earlier Broadsheets may still be available from the author. A full list can be obtained from the Publications Secretary, Association of Clinical Pathologists, 221 Preston Road, Brighton BN1 6SA.*

### Prices

**INLAND** One copy, £2.50; 2-10 copies (of any one broadsheet or reprint), £2.00 each; 11-100 copies (of any one), £1.75 each; 101 plus copies (of any one), price to be agreed; authors (over 50 free copies), £1.25 each.

**OVERSEAS** One copy, \$6.75; 2-10 copies (of any one broadsheet or reprint), \$5.25; 11-100 copies (of any one), \$3.75; 101 plus copies (of any one), price to be agreed.

Authors \$2.25. Prices include postage but air mail will be charged extra.

Trade discount 10%. All orders (and all changes of address of regular subscribers) should be sent to the Publishing Manager · *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR.

# Mothers, Babies, and Disease in Later Life

*One of these babies is more likely to develop coronary heart disease, stroke, diabetes, and chronic bronchitis in adult life.*

*Find out why in Mothers, Babies and Disease in Later Life.*

In this fascinating book David Barker tells the story of how he and his colleagues at the MRC Environmental Epidemiology Unit at the University of Southampton pieced together the evidence that the nutrition of the fetus and newborn infant has significant effects on its health in later life. For the first time, this exciting research is made accessible to the non-specialist, bringing the reader right up to date with the very latest findings.

*This unique, readable account:*

- Describes the scientific basis for the argument that improving the diet and health of young women will prevent coronary heart disease, stroke and diabetes in the next generation
- Reviews the link between early infection and adult diseases
- Presents strategies for preventing disease in the future

Also available from the BMJ
