## Association of Clinical Pathologists

**President:** Professor FD Lee; **President-Elect:** Dr WR Timperley; **Vice-Presidents:** Dr JP O'Shea, Dr PJ Fitzpatrick;  
**Chairman of Council:** Dr DM Harris; **Honorary Secretary:** Dr AJ Malcolm; **Honorary Treasurer:** Dr AC Ames  
**General Secretary:** Mrs JS Turner, 221 Preston Road, Brighton BN1 6SA; Tel: (0273) 561188; Fax: (0273) 541227

## Information for Authors

**Papers should be sent in duplicate to the Editors, *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR. Telephone numbers: 071 383 6209/6214. Fax number: 071 383 6668. They should be typewritten with double spacing on one side of the paper only. The names of the authors with initials or one forename should be followed by the name of the institution where the work was performed. An indication of the position held by each author must be given in an accompanying letter to the Editors, and this should include the signatures of all authors on papers with joint authorship. Guidelines on authorship are detailed in *J Clin Pathol* 1986;39:110. Results should not be shown as both tables and graphs, and histograms should not be used where tabular information would be more appropriate.**

**ARTICLES** Papers should usually be no more than 2000 words long and should report original research of relevance to the understanding and practice of clinical pathology. They should be written in the standard format with a structured abstract. The abstract should contain the headings *Aims, Methods, Results and Conclusions* and be no more than 300 words long. The body of the paper should have separate sections for the introduction, the methods and the results, and the discussion. If statistics are used the methods and confidence intervals should be stated. Authors are urged to seek expert advice if in doubt. Occasional Articles have a less rigid format, being 1500-2000 words in length. They are usually invited by the editors, though unsolicited submissions will be considered. Single case reports and brief papers (such as those describing negative findings) will usually be considered only as Short Reports. The format for these is an unstructured 150 word summary, up to 1500 words of text, up to two tables or figures (or one of each) and no more than 10 references. Letters to the Editor should normally refer to previously published papers or make some point about the practice of pathology. They are not intended to be a vehicle for the presentation of new data unrelated to earlier Journal articles.

**ACKNOWLEDGMENT OF RECEIPT** A stamped addressed postcard should be enclosed for return to the author as acknowledgment of receipt of the manuscript. Overseas authors should enclose international reply paid coupons.

**ETHICS** The critical assessment of papers submitted will include ethical considerations.

**ILLUSTRATIONS** Diagrams should be reproduced photographically. The legends for illustrations should be typed with double spacing on a separate sheet. Photographs and photomicrographs must be of high quality in full tonal scale on glossy paper, and unmounted. Only salient detail should be included. Areas without tissue ("background") should be as near white as possible. The width of illustrations should be 6.7 cm, 10.2 cm, 13.7 cm or, in exceptional circumstances, 17.4 cm, to fit the column layout of

the Journal. Colour reproduction is welcomed and is subsidised by the Journal; for details of costs to the author please contact the Journal office.

**ABBREVIATIONS** Abbreviations must be spelt out on first use or be accompanied by explanation in the text. The use of non-standard abbreviations and acronyms should be avoided.

Symbols and abbreviations should be in the Vancouver style.

**UNITS** All measurements should be given in SI units.

**REFERENCES** The references must be given in the Vancouver style.

**REPRINTS** These may be ordered when the proof is returned. Prices for large numbers of reprints available on request.

**NOTICE TO ADVERTISERS** Applications for advertisement space and for rates should be addressed to the Advertisement Manager, *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR.

The *Journal of Clinical Pathology* is published monthly. The annual subscription rates are £188.00; USA \$341.00. Orders should be sent to The Subscription Manager, *Journal of Clinical Pathology*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR. Subscribers may pay for their subscriptions by Access, Visa, or American Express, by quoting on their order the credit or charge card preferred, together with the appropriate personal account number and expiry date of the card. Orders can also be placed with any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, may also be sent to the *British Medical Journal*, Box 560B, Kennebunkport, Maine 04046, USA. All enquiries, however, must be addressed to the publisher in London.) All enquiries regarding air mail rates and single copies already published should be addressed to the publisher in London.

## Book reviews

If you wish to order, or require further information regarding, the titles reviewed here, please write or telephone the BMJ Bookshop, PO Box 295, London WC1H 9TE. Tel: 071 383 6244. Fax: 071 383 6662. Books are supplied post free in the UK and for British Forces Posted Overseas addresses. Overseas customers should add 15% for postage and packing. Payment can be made by cheque in sterling drawn on a UK bank, or by credit card (MasterCard, VISA, or American Express) stating card number, expiry date, and your full name.

The price and availability are occasionally subject to revision by the Publishers.)

**Acute Pancreatitis. Diagnosis and Therapy.** Ed EL Bradley III. (Pp 312; \$157.50.) Raven Press. 1993. ISBN 0-7817-0091-4.

This multiauthor book is written almost entirely by and is chiefly of interest to clinicians. There are, however, several chapters of interest to pathologists. These include the pathophysiology of acute pancreatitis, a comparison of necrotising pancreatitis among various countries, and the epidemiology of pancreatic abscesses and pseudocysts. There is much information on the investigation of acute pancreatitis and treatment, both new and established. Three chapters are primarily concerned with pathology. The pathology of severe acute pancreatitis is discussed along with its aetiology—alcohol, gall stones, and other possible causes. Its natural history, with the possible outcomes of resolution or pseudocyst formation, is considered. The primary event remains uncertain, but there is some evidence for lysosomal activation of proenzymes. There is a description of the pathology of pseudocysts, their hallmark being a lack of epithelial lining. Their natural history with the vascular evolution is also covered. Finally, there is a chapter on the pathology of oedematous or interstitial pancreatitis, an acute pancreatitis where gross necrosis and haemorrhage have not been grossly demonstrated. The diagnosis is established on upper abdominal pain and a raised serum amylase concentration.

This book would be useful for the general hospital library and as background reading for the gastroenterologically orientated pathologist.

D HOPWOOD

**Bone Histomorphometry.** EF Eriksen, DW Axelrod, F Melsen. (Pp 96; soft cover \$19.00.) Raven Press. 1993. ISBN 0-7817-0122-8.

This small book describes in simple terms the normal microanatomy of bone and bone cell function. It introduces the concept of bone remodelling in units and the dynamic changes which occur in bone. The basis of the evaluation of bone by histomorphometry is described along with the clinical indications, in the opinion of the authors, for bone biopsy. Various histomorpho-

metric indices are described and formulae for derived measures of bone activity are given. Some chapters are too short and superficial to be of much value, but on the whole the book is well conceived and executed. Each chapter has a useful summary and there is a single bibliography of 59 references for the whole work.

The illustrations are in colour and of variable quality in reproduction. There are now several books dealing with bone histomorphometry which are much larger and more threatening than this one. But it should be useful to diagnostic histopathologists and physicians with an interest in metabolic bone disease.

PA REVELL

**The Scars of Venus. A History of Venereology.** JD Oriel. (Pp 248; £65.) Springer. 1994. ISBN 3-540-19844-X.

David Oriel has long had an interest in the background to this speciality, and his enthusiasm and knowledge are obvious on reading this book, despite his disclaimer in the preface. His worthy contribution is enhanced by the typography chosen, and the many excellent black and white illustrations. He looks at the history of syphilis, "the French disease", presenting the two theories of its origin in Europe with clinical calm, unlike some previous writers on the subject. There are chapters on the great advances in syphilology during the 19th and early 20th centuries. Chancroid, donovanosis, and gonorrhoea are also well documented. The section on genital warts is particularly helpful, reflecting the author's long interest in the subject. Chlamydial infections are also well covered.

The venereologists who pushed the science and practice forward are also described, although Ambrose King and Claude Nicol, the worthy successors to Colonel Harrison and some of Oriel's own teachers, are omitted. As history blends with the present, a few pages are devoted to HIV infection, but as with clinical texts in this subject, the definitive work remains to be written. This is the best volume so far on the history of venereology and should be read by all interested in the subject, and especially those who teach to others.

P SIMMONS

## Notices

### The Society for Tropical Veterinary Medicine

Third Biennial Meeting (STVM-95)  
San José, Costa Rica, May 8-12, 1995

Two symposia, one on Vector-borne pathogens: challenges for the 21st Century and the second on international trade and animal diseases, as well as general sessions on tropical veterinary medicine.

For further information, fax Dr James A House at 010-516-323-2798 in the USA or write to USDA/APHIS/FADDL, Box 848, Greenport, NY 11944, USA.

### The Royal Society of Health Conference

#### Management of Trust Hospitals (MH/404)

**Date:** Wednesday 14 September 1994.  
**Venue:** The University of Leeds, Clinical Sciences Building, St Jaes's Hospital, Leeds LS9 7TF.  
**Fee:** £80 Non-members; £50 for RSH members and charities; £30 for retired RSH members and students; £70 per head for groups of 3 or more.

#### Cardiovascular Disease (CD/308)

**Date:** Thursday 22 September 1994  
**Venue:** The Society for Chemical Industry, 14/15 Belgrave Square, London SW1X 8PS.  
**Fee:** £80 Non-members; £50 for RSH members and charities; £30 for retired RSH members and students; £70 per head for groups of 3 or more.

#### Weaning (ZW/408)

**Date:** Tuesday 11 October 1994  
**Venue:** The Society for Chemical Industry, 14/15 Belgrave Square, London SW1X 8PS.  
**Fee:** £80 Non-members; £50 for RSH members and charities; £30 for retired RSH members and students; £70 per head for groups of 3 or more.

All enquiries to Anne Faichney/Iris Murphy, Conference Department, The Royal Society of Health, RSH House, 38A St George's Drive, London SW1V 4BH. Telephone: 071 630 0121. Fax: 071-976 6847.

### XII Latin American Congress of Clinical Biochemistry Buenos Aires, Argentina September 5-10, 1995

Simultaneously with the III Argentine Congress of Clinical Biochemistry (CUBRA III), the II Meeting of Biochemistry of the Mercosur, and the I Latin American Symposium of Biochemical Education.

Invited lecturers from the United States, Europe and Latin American countries will develop a scientific programme including plenary lectures, symposia, round tables, as well as workshops, and courses on different areas of clinical chemistry, endocrinology, haematology, immunology, toxicology, bacteriology, mycology, parasitology, virology, etc. Poster sessions, and a commercial exhibition will be included.

For further information please contact:

Secretaría/Secretariat, XII Latin American Congress of Clinical Biochemistry, Federación Bioquímica de la Provincia de Buenos Aires, 6 No. 1344, 1900 La Plata, Argentina. Telephone: (54 21) 38821, 42797, 253597. Fax: (54 21) 254224. E-mail (Internet): congreso@fbpba.sld.org.ar
