

**Reviews**

- 561 Mouse models of childhood cancer of the nervous system  
M A Dyer
- 577 Membrane associated proteases and their inhibitors in tumour angiogenesis A Noel, C Maillard, N Rocks, M Jost, V Chabottaux, N E Sounni, E Maquoi, D Cataldo, J M Foidart

**Original articles**

- 585 Identification of three novel RBI mutations in Brazilian patients with retinoblastoma by "exon by exon" PCR mediated SSCP analysis E Braggio, C R Bonvicino, F R Vargas, S Ferman, A L A Eisenberg, H N Seúñez
- 591 Prognostic impact of VEGF, CD31, CD34, and CD105 expression and tumour vessel invasion after radical surgery for IB-IIA non-small cell lung cancer T C Mineo, V Ambrogi, A Baldi, C Rabitti, P Bollero, B Vincenzi, G Tonini
- 598 Tissue invasiveness and non-acidic pH in human candidiasis correlate with "in vivo" expression by *Candida albicans* of the carbohydrate epitope recognised by new monoclonal antibody 1H4 C Monteagudo, A Viudes, A Lazzell, J P Martinez, J L Lopez-Ribot
- 604 Systemic mastocytosis with associated clonal haematological non-mast cell lineage diseases: a histopathological challenge H-P Horny, K Sotlar, W R Sperr, P Valent
- 609 Do *Toxoplasma gondii* RH strain tachyzoites evolve during continuous passage? S Mavin, A W L Joss, J Ball, D O Ho-Yen
- 612 Heterogeneity of the fibre sequence in subgenus C adenoviruses A K Adhikary, U Banik, J Numaga, E Suzuki, T Inada, N Okabe
- 618 Sentinel lymph node investigation in melanoma: detailed analysis of the yield from step sectioning and immunohistochemistry H A Gietema, R J C L M Vuylsteke, I A de Jonge, P A M van Leeuwen, B G Molenkamp, J R M van der Sijp, S Meijer, P J van Diest
- 621 High prevalence of haemosiderin accumulation in the cytoplasm of gastric glands in patients with liver cirrhosis H Hattori
- 625 Immunostaining patterns of myoepithelial cells in breast lesions: a comparison of CD10 and smooth muscle myosin heavy chain A N Kalof, D Tam, B Beatty, K Cooper
- 630 Inflammatory cells contribute to the generation of an angiogenic phenotype in pancreatic ductal adenocarcinoma I Esposito, M Menicagli, N Funel, F Bergmann, U Boggi, F Mosca, G Bevilacqua, D Campani
- 637 Use of multiple displacement amplification to amplify genomic DNA before sequencing of the  $\alpha$  and  $\beta$  haemoglobin genes M Mai, J D Hoyer, R F McClure

**Short reports**

- 641 CDX-2 immunostaining in primary and secondary ovarian carcinomas L Tornillo, H Moch, P-A Diener, A Lugli, G Singer
- 644 High resolution microarray comparative genomic hybridisation analysis using spotted oligonucleotides B Carvalho, E Ouwerkerk, G A Meijer, B Ylstra

- 647 Resistance to scrapie in PrP ARR/ARQ heterozygous sheep is not caused by preferential allelic use P A Caplazi, K I O'Rourke, T V Baszler
- 651 Leukaemia/lymphoma cell microparticles in childhood mature B cell neoplasms S Savasán, M Büyükcavcı, S Buck, Y Ravindranath
- 654 Effect of buffered formalin on amplification of DNA from paraffin wax embedded small biopsies using real-time PCR V Zsikla, M Baumann, G Cathomas
- 657 *Chlamydia trachomatis* serovar E isolates from patients with different clinical manifestations have similar courses of infection in a murine model: host factors as major determinants of *C trachomatis* mediated pathogenesis J M Lyons, J I Ito Jr, S A Morré

**Case reports**

- 660 Myocardial air collections as a result of infection with a gas producing strain of *Escherichia coli* H J J van der Vliet, H W M Niessen, R M Perenboom
- 662 Diagnosis of aspergillus peritonitis in a renal dialysis patient by PCR and galactomannan detection J M Scotter, J M Stevens, S T Chambers, K L Lynn, W N Patton
- 665 Treatment difficulties of a listerial rhombencephalitis in an adult patient allergic to penicillins G A Popescu, M Saquepée, D Poisson, T Prazuck
- 667 Atypical haemolytic uraemic syndrome as a complication of induction chemotherapy for acute lymphoblastic leukaemia D Chandra, S Lawson, P Ramani

First published in 1945, Journal of Clinical Pathology is a core publication for workers in all disciplines of clinical pathology. Published monthly, it features high quality original papers, and short reports.

Research areas covered are: histopathology; haematology; microbiology, cytopathology; pathology, molecular pathology, forensic pathology; dermatopathology; neuropathology; and immunopathology.

The image representing chemical pathology (see page 641) is published with the kind permission of the Swiss Institute of Bioinformatics (copyright 2004, Swiss Institute of Bioinformatics, Geneva, Switzerland). Courtesy of Amersham Biosciences Ltd.
