ACP Best Practice No 178. Examination of the human placenta

A review of the heritability of idiopathic nephrolithiasis

Genetic pathways to melanoma tumorigenesis

Secular trends of nocardia infection over 15 years in a tertiary care hospital

Expression of vascular endothelial growth factor D is associated with hypoxia inducible factor (HIF-1 α) and the HIF-1 α target gene DEC1, but not lymph node metastasis in primary human breast carcinomas

Intraepithelial lymphocytes in the villous tip: do they indicate potential coeliac disease?

The relation between bone marrow angiogenesis and the proliferation index Ki-67 in multiple myeloma

Videos have a role in postgraduate necropsy education

First published in 1945, Journal of Clinical Pathology is a core publication for workers in all disciplines of clinical pathology. Published monthly, it features high quality original papers, and short reports.

Research areas covered are: histopathology; haematology; microbiology, cytopathology; clinical pathology, molecular pathology, forensic pathology, dermatopathology; neuropathology; and immunopathology.

The image representing chemical pathology (see page 882) is published with the kind permission of the Swiss Institute of Bioinformatics (copyright © 2004 Swiss Institute of Bioinformatics, Geneva, Switzerland). Courtesy of Amersham Biosciences Ltd.
