

Guidelines for breast needle core biopsy handling and reporting in breast screening assessment

The detection of circulating breast cancer cells in blood

Demystified... recombinant antibodies

Ki-ras gene mutations, LOH of the APC and DCC genes, and microsatellite instability in primary colorectal carcinoma are not associated with micrometastases in pericolic lymph nodes or with patients' survival

Relation between lymphopenia and bacteraemia in UK adults with medical emergencies

Supervised automated microscopy increases sensitivity and efficiency of detection of sentinel node micrometastases in patients with breast cancer

***Clostridium difficile* associated diarrhoea**

Statin precipitated lactic acidosis?

Resolution of chronic severe refractory thrombocytopenia after treatment of hypothyroidism

Pathology of astrovirus associated diarrhoea in a paediatric bone marrow transplant recipient

First published in 1945, *Journal of Clinical Pathology* is a core publication for workers in all disciplines of clinical pathology. Published monthly, it features high quality original papers, and short reports.

Research areas covered are: histopathology; cytology; haematology; microbiology; cytopathology; clinical pathology; molecular pathology; forensic pathology; dermatopathology; neuropathology; and immunopathology.
