

(Top) Molecular and hematological characterization of hemolytic anemia associated with biallelic KLF1 mutations: A case series 2 Representative Hb analysis on capillary electrophoresis of a subject (P1) with biallelic KLF1 mutations. Hb Bart's, Hb A, Hb F, Hb Portland I and Hb A2 are indicated. Hb, haemoglobin; KLF1, Krüppel-like factor 1. (Bottom) Nuclear Staining for Pan-Trk by Immunohistochemistry Is Highly Specific for Secretory Carcinoma of breast: Pan-Trk in Various Subtypes of Breast Carcinoma Figure 1 Positive pan-Trk staining in secretory carcinoma from breast origin (A, B) and salivary gland origin (C, D). Original magnifications,  $\times 200$ .

## Contents

November 2024 Volume 77 Issue 11

### Gene of the month

- 721** *EWSR1*: the promiscuous king of mesenchymal neoplasia  
*E A Towerly, D J Papke*

### Original research

- 726** Should a borderline negative HER2 result in a core biopsy of invasive carcinoma of the breast have HER2 assessment repeated in the excision specimen?  
*A H S Lee, Z Hodi, A Abbas, P Wencyk, I O Ellis, E Rakha*
- 730** PD-L1 protein expression in breast cancer  
*S A Saastad, A H Skjervold, B Ytterhus, M J Engström, A M Bofin*
- 737** Cross-sectional study to evaluate the utility of elastic tissue staining in primary cicatricial alopecia  
*T Vishwanath, R Dhurat*
- 743** Correlation of low numbers of intratumoral FOXP3+ cells with worse progression-free survival in angioimmunoblastic T cell lymphoma  
*H-L Liu, S-W Weng, C-C Chou, H-L You, M-C Wang, M-C Ma, W-T Huang*
- 751** Nuclear staining for pan-Trk by immunohistochemistry is highly specific for secretory carcinoma of breast: pan-Trk in various subtypes of breast carcinoma  
*Q Ye, H Chen, C Han, Y Peng, X Huang, H Sun, Y Wu, C T Albarracin, L P Middleton, A A Sahin, L Huo, Q Ding*

- 761** PAX5 and CD70 are expressed in thymic carcinoma but not in atypical thymoma (WHO type B3 thymoma): an immunohistochemical analysis of 60 cases  
*A Weissferdt, C Moran*

- 766** Application of algorithmic cytomorphological assessment and immunocytochemistry with the international system for reporting serous fluid cytopathology on pericardial fluid cytology  
*J J X Li, W Cheung, J K M Ng, G M Tse*

### Review

- 772** Pitfalls in the diagnosis and management of acid-base disorders in humans: a laboratory medicine perspective  
*H Carlton, K E Shipman*

### Short report

- 779** Medium-term storage of frozen residual antenatal sera in gel separator tube is suitable for subsequent serological investigation of intrauterine infection  
*W Ng, T Y Tan, X Y V Chow, S H Lim, W Y Wan*

### Original research

- 783** Molecular and haematological characterisation of haemolytic anaemia associated with biallelic KLF1 mutations: a case series  
*K Singha, N Teawtrakul, G Fucharoen, S Fucharoen*

### PostScript

- 790** How—and why—to fill up a surgical pathology requisition form  
*S A Pai*
- 792** Streamlining pathology orders in a time-crunched medical world: much ado about requisitions  
*V Deshpande*

- 756** Molecular diagnosis of tuberous sclerosis complex in fetuses and infants: an institutional case series  
*A S Bolshakova, D N Maslennikov, J Shubina, A A Bystritskiy, E R Tolmacheva, I S Mukosey, T O Kochetkova, G S Vasiliev, E E Atapina, I O Sadelov, N V Zaretskaya, I Y Barkov, D N Degtyarev, D Y Trofimov*
