

# Hypothalamic and Pituitary Hormones

---

Symposium organised by  
The Association of Clinical Pathologists  
held in London on  
22 and 23 November 1976

---

Edited by  
G. K. McGowan and G. Walters

Withdrawn from Collection  
of Biomedical Library-Us

Published as a supplement to the  
Journal of Clinical Pathology by the  
British Medical Association, Tavistock Square, London WC1H 9JR  
£4.00

monthly by the British Medical Association, from  
BMA House, Tavistock Square, London.*

# Index

- Acromegaly, 62  
—, clinical features of, 62  
—, management of, 64  
—, natural history and diagnosis of, 63  
Adrenocorticotrophic hormone, 33  
Anorexia nervosa, GnRH in, 49  
Antidiuretic hormone production by tumours, 28
- BEARDWELL, C. G.: The posterior pituitary and diabetes insipidus, 68  
BESSER, G. M.: Pituitary and hypothalamic physiology, 8  
BITENSKY, L.: Cytochemical methods of hormone assay, 22  
Blood supply of hypothalamus, 4  
Bromocriptine and pregnancy, 38  
— in acromegaly, 67  
— in hyperprolactinaemia in men, 39  
BUTT, W. R.: Relationships of structure with function of the gonadotrophins, 12
- Cellular mechanisms and hormone production by tumours, 26  
Chorionic gonadotrophin, human, 31  
Corticotrophin, 19  
—, cytochemical bioassay of, 23  
— production by tumours, 27  
—, section assay of, 23
- DANIEL, P. M.: Anatomy of the hypothalamus and pituitary gland, 1  
Diabetes insipidus and posterior pituitary, 68
- Glycoprotein hormones, 18  
Goitre, non-toxic, TRH test in, 55  
Gonadal failure, GnRH in, 49  
Gonadotrophin releasing hormone, 9, 46  
— — —, analogues of, 52  
— — —, assay methods for, 52  
— — —, in normal females, 47  
— — —, — — males, 46  
— — —, in pathologicat states, 48  
— — —, in puberty and menopause, 47  
— — —, side effects of, 51  
— — — therapy, 50  
Gonadotrophins, assays of, defects in, 44  
—, differential LH or FSH deficiency, 43  
—, relationships of structure with function in, 12  
—, secretion, disorders of, 42  
—, serum levels, age variations in, 42  
—, — —, daily and hourly variations in, 43  
Graves's disease, ophthalmic, TRH test in, 56  
Growth hormone deficiency, types and response to HGH, 59  
— —, human. *See* Human growth hormone  
— — production by tumours, 27  
— — release-inhibiting hormone, 11
- HALL, R., and SCANLON, M. F.: Thyrotrophin releasing hormone in clinical practice, 55  
Hormone assay, cytochemical methods of, 22  
Human chorionic gonadotrophin, 31  
— growth hormone, 16  
— — —, therapeutic use of, 58  
— placental lactogen, 32  
Hyperprolactinaemia, 37  
—, hypogonadism in, 39  
— in men, 37, 39  
—, medical treatment of, 38  
— with infertility, GnRH in, 49  
Hyperthyroidism, TRH test in, 56
- Hypogonadism in hyperprolactinaemia, 39  
Hypothalamic disease, GnRH test in, 48  
— hormones, 8  
— — —, clinical importance of, 9  
— — —, purification of, 16, 20  
— — —, secretion by non-endocrine tumours, 26, 28  
Hypothalamic-pituitary disease, TRH test in, 56  
Hypothalamus, anatomy of, 1  
—, physiology of, 8  
Hypothyroidism, TRH test in, 55
- Infertility with hyperprolactinaemia, GnRH in, 49
- JEFFCOATE, S. L.: Disorders of gonadotrophin secretion, 42  
JONES, R. L. *See* LOWRY, P. J., MCLEAN, C., JONES, R. L., and SATGUNASINGAM, N.
- Lactogen, placental, human, 32  
Lipotrophin, 19  
LOWRY, P. J., MCLEAN, C., JONES, R. L., and SATGUNASINGAM, N.: Purification of anterior pituitary and hypothalamic hormones, 16
- MCLEAN, C. *See* LOWRY, P. J., MCLEAN, C., JONES, R. L., and SATGUNASINGAM, N.  
MARTIN, T. J.: Secretion of hypothalamic and pituitary hormones by non-endocrine tumours, 26  
MASON, A. S.: Therapeutic use of human growth hormone, 58  
Melanotrophin, 19  
MORTIMER, C. H., and YEO, T.: Gonadotrophin-releasing hormone, 46
- NABARRO, J. D. N.: Management of acromegaly, 62  
Nerve cells of hypothalamus, 1  
Neural pathways of hypothalamus, 4  
Neurovascular link between hypothalamus and pituitary gland, 4
- Ophthalmic Graves's disease, TRH test in, 56  
Organ maintenance culture and hormone assay, 22
- Peptides, pituitary-like, secretion by placenta, 31  
Pituitary disease, GnRH test in, 48  
— gland, anatomy of, 1, 4  
— — —, physiology of, 8  
— — —, posterior, and diabetes insipidus, 68  
— — — hormones, anterior, 8  
— — — —, purification of, 16  
— — —, secretion by non-endocrine tumours, 26  
— — — tumours and hyperprolactinaemia, 37  
Pituitary-like peptides, secretion by placenta, 31  
Placenta, secretion of pituitary-like peptides by, 31  
Placental hormones and immunology of pregnancy, 34  
— lactogen, human, 32  
Polycystic ovary syndrome, GnRH in, 49  
Pregnancy and bromocriptine, 38  
—, immunology of, and placental hormones, 34  
Prolactin, 18  
— release-inhibiting hormone, 11  
— releasing factor, 36  
— secretion, disorders of, 36  
— — —, mechanism of control, 36  
— — —, response to age and other factors, 36
- REES, L. H.: Secretion of pituitary-like peptides by the human placenta, 31  
Regulatory hormones, 8

Release-inhibiting hormones, 9

Releasing hormones, 8

SATGUNASINGAM, N. *see* LOWRY, P. J., MCLEAN, C., JONES, R. L.,  
and SATGUNASINGAM, N.

SCANLON, M. F. *See* HALL, R., and SCANLON, M. F.

Seminiferous tubules, dysfunction of, GnRH in, 49

Testicular feminisation syndrome, GnRH in, 49

THORNER, M. O.: Disorders of prolactin secretion, 36

Thyroid disease, TRH test in, 55

— stimulating hormone, response to TRH, 55

— — — secretion, neuroregulation of, 56

Thyrotrophic hormone, 33

Thyrotrophin, cytochemical bioassay of, 24

— releasing hormone, 9

— — —, causes of absent response to, 56

— — — in clinical practice, 55

— — —, normal TSH response to, 55

— — — — test in hypothalamic-pituitary disease, 56

— — — — in normal subjects, factors affecting, 55

— — — — in thyroid disease, 55

— — —, therapeutic applications of, 57

Tumours, non-endocrine, secretion of hypothalamic and  
pituitary hormones by, 26

—, pituitary, and hyperprolactinaemia, 37

Vasopressin and diagnosis of diabetes insipidus, 68

—, problems in assay of, 69

YEO, T. *See* MORTIMER, C. H., and YEO, T.
