

Gastrointestinal and Related Hormones

Symposium organised by
The Association of Clinical Pathologists
held in London on
6 and 7 November 1978

Edited by
G. Walters and S. R. Bloom

Published as a supplement to the
Journal of Clinical Pathology by the
British Medical Association, Tavistock Square, London WC1H 9JR
£5.00

COPYRIGHT © Journal of Clinical Pathology

*The Journal of Clinical Pathology is published
monthly by the British Medical Association,
from BMA House, Tavistock Square, London.*

Index

- Adenocarcinomas of pancreas, pancreatic polypeptide in, 48
Adenopathy, endocrine, multiple, type 1, 88
ADRIAN, T. E.: Pancreatic polypeptide, 43
Age, effect on pancreatic polypeptide, 46
Alimentary. *See* Gastrointestinal
Amines, histochemical techniques for, 7
Antral G cell hyperplasia, 21
Apudomas, diagnosis of, 88
— of pancreas, orthoendocrine, 86
— — —, paraendocrine, 87
— of stomach and intestines, orthoendocrine, 88
ARDILL, J. E. S. *See* BUCHANAN, K. D., and ARDILL, J. E. S.
- BESTERMAN, H. S.: Gut hormones in gastrointestinal disease, 76
BLACKBURN, A. M.: Neurotensin, 12
Blood glucose, insulin, and glucagon, action of neurotensin on, 13
Bombesin, 73
Bowel, irritable, gut hormones in, 82
Brain and gut peptides, 68
— — — —, vertebrate, phylogeny of, 3
BRYANT, M. G.: Vasoactive intestinal peptide, 63
BUCHANAN, K. D., and ARDILL, J. E. S.: Pathophysiology of gastrin and secretin, 17
- Carcinoid tumours, gastrointestinal, 88
— — —, pancreatic polypeptide in, 48
Cerebrospinal fluid, cholecystokinin in, measurement of, 29
Cholecystokinin, assay methods for, 27
—, concept of, development of, 26
— in tissue, molecular heterogeneity of, 28
— isolated from porcine gut, structure of, 26
—, — — —, measurement of, 26
—, — — —, in biological fluids, 29
—, — — —, in tissue extracts, 28
CHRISTOFIDES, N. D.: Importance of the jejunal hormone motilin, 51
Coeliac disease, gut hormones in, 76
Colitis, ulcerative, gut hormones in, 78
Crohn's disease, gut hormones in, 78
- DAWSON, I. M. P.: Visualisation of the diffuse endocrine system, 7
Diabetes mellitus, gastric inhibitory polypeptide in, 34
—, pancreatic polypeptide in, 46
Diarrhoea, infective, gut hormones in, 79
—, motilin in, 55
—, pancreatic polypeptide in, 47
DOCKRAY, G. J.: The endocrine versatility of the gut: general and evolutionary aspects of the active peptides of the gastrointestinal tract, 1
Dumping syndrome, motilin in, 55
Duodenal ulcer, gastric inhibitory polypeptide in, 35
— — —, motilin in, 55
— — —, plasma gastrin assay in, 19
Duodenum, motility of, effect of motilin, 52
- Endocrine adenopathy, multiple, type 1, 88
— cells, gastrointestinal. *See* Gastrointestinal endocrine cells
— tumours, gastrointestinal, clinical features and diagnosis of, 85
— — — of pancreas, pancreatic polypeptide in, 47
Enkephalins, 72
Enteric glucagon-like peptides, 58
Enteroinsular axis, 38
— — —, physiological significance of, 41
— interactions, 40
- G cells, antral, hyperplasia of, 21
Gastric acid secretion, inhibition by gastric inhibitory polypeptide, 33
— function and motility, effect of neurotensin, 14
— inhibitory polypeptide, 31
— — — —, cellular localisation and distribution of, 32
— — — —, chemistry of, 31
— — — —, insulinotropic action of, 33
— — — —, measurement of, 32
— — — —, pathology of, 34
— — — —, physiology of, 33
Gastrin and secretin, pathophysiology of, 17
— deficiency, 22
—, investigative methods for, 18
—, nature of, 17
—, plasma, assay in duodenal ulcer, 19
Gastrinomas, 21, 87
Gastrointestinal cholecystokinin, measurement of, 28
— disease, gut hormones in, 76
— disorders, gastric inhibitory polypeptide in, 35
— endocrine cells and nerves, peptide interrelationships of, 1
— — — —, histochemical techniques for, 7
— — — —, histochemical-immunological correlation of, 10
— — — —, histochemical-ultrastructural correlation of, 9
— — — —, immunocytochemical techniques for, 9
— — — —, types and products of, 85
— — — —, — and techniques for differentiation, 7
— — — —, ultrastructural techniques for, 9
— — — — tumours, clinical features and diagnosis of, 85
— glucagon-like immunoreactants, 39, 58
— — — —, structure of, 59
— hormones in gastrointestinal disease, 76
— peptides, active, general and evolutionary aspects, 1
— — — —, molecular evolution of, 3
— — — — and brain peptides, 68
— — — — —, vertebrate, phylogeny of, 3
— tract, neurotensin distribution in, 13
Glucagon, 38
—, glucose, and insulin in blood, action of neurotensin on, 13
Glucagon-like immunoreactants, gastrointestinal, 39
— — — —, and other enteric glucagon-like peptides, 58
— — — —, structure of, 59
Glucagonomas, 86
Glucose, insulin, and glucagon in blood, action of neurotensin on, 13
Glucose-dependent insulinotropic (poly)peptide, 34, 39
Gut. *See* Gastrointestinal
- Hormones, gastrointestinal, in gastrointestinal disease, 76
Hypergastrinaemia, 20
Hypothalamic-pituitary endocrine system, effect of neurotensin, 14
- Insulin, glucose, and glucagon in blood, action of neurotensin on, 13
Insulin-releasing polypeptide, 39
Insulinomas, 86
Intestinal apudomas, orthoendocrine, 88
— resection, gut hormones in, 80
— — —, pancreatic polypeptide in, 47
Irritable bowel syndrome, gut hormones in, 82
- Lead haematoxylin technique for screening of endocrine cells, 8
- Malabsorption, tropical, gut hormones in, 77
MARKS, V.: The enteroinsular axis, 38
Metachromatic techniques for screening of endocrine cells, 8

- MOODY, A. J.: Gut glucagon-like immunoreactants and other enteric glucagon-like peptides, **58**
- Motilin, actions of, **52**
 —, history of, **51**
 —, importance of, **51**
 —, localisation of, **52**
 —, pathology of, **55**
 —, pharmacokinetics of, **53**
 —, radioimmunoassay of, **51**
 —, release of, **53**
 —, structure of, **51**
- Nerves and gut endocrine cells, peptide interrelationships of, **1**
 —, peptides of. *See* Brain and gut peptides
- Nervous system, central, cholecystokinin in, measurement of, **28**
 — —, —, neurotensin distribution in, **12**
- Neurotensin, **12**
 —, biological actions of, **13**
 —, biologically active site of, **14**
 —, distribution in central nervous system, **12**
 —, — in gastrointestinal tract, **13**
 —, — in plasma, **13**
 —, physiological role of, **14**
- Obesity, morbid, gut hormones in, effect of jejunoileal bypass, **80**
 —, pancreatic polypeptide in, **47**
- Pancreatic adenocarcinomas, pancreatic polypeptide in, **48**
 — apudomas, orthoendocrine, **86**
 — —, paraendocrine, **87**
 — endocrine tumours, pancreatic polypeptide in, **47**
 — insufficiency, gut hormones in, **79**
 — polypeptide, **43**
 — —, actions of, **45**
 — —, future of research in, **48**
 — —, infusion in man, **45**
 — —, localisation of, **43**
 — —, pathophysiology of, **46**
 — —, release of, **43**
