

Developments in Immunopathology

Symposium organised by
The Royal College of Pathologists
delivered in London in February 1979

Edited by
E. J. HOLBOROW

Published for The Royal College of Pathologists by the
Journal of Clinical Pathology, BMA House, Tavistock Square
London WC1H 9JR England

£7.50

***The Journal of Clinical Pathology is published monthly
by the British Medical Association, from BMA House,
Tavistock Square, London WC1H 9JR***

Index

- Acetylcholine receptors and alpha-bungarotoxin, 98
Adenosine deaminase deficiency, 11
Alpha-bungarotoxin and acetylcholine receptors, 98
Anaemia, haemolytic, autoimmune, warm, 93, 94, 95
—, —, tissue specific autoantibodies in, 90
Anti-acetylcholine receptor antibodies, absence in congenital myasthenia gravis, 103
— — — —, heterogeneity of, 100
— — — —, in myasthenia gravis, 98
Antibodies, lymphocytotoxic, in systemic lupus erythematosus, clinical significance of, 112
—, —, tissue-specific, in myasthenia gravis, 97
Antibody affinity, immunogenetic aspects and relationship to immune complex disease, 120
— deficiency, diagnosis of, 23
— — — — secondary to lymphoid neoplasia, 19
— diversity, cellular basis of, 78
— expression, two forms of, 78
— formation, control of, 76
— -mediated tissue damage, 85–129
— repertoire, 76
— responses, established, effect of immunosuppressive agents, 126
Anti-DNA antibodies, 108
Antigenic stimulation, effect on lymphocyte distribution, 66
— stimulus in myasthenia gravis, 101
Antinuclear acid antibodies, 107
ASHERSON, G. L., JOHNSON, S., PLATTS-MILLS, T. A. E., and WEBSTER, A. D. B.: Pathogenesis of hypogammaglobulinaemia with thymoma and late-onset hypogammaglobulinaemia, 5
Autoantibodies in myasthenia gravis, 97
—, —, tissue specific, in haemolytic anaemia, 90
Autoimmune disease, immunosuppressive agents in, 126

B cell neoplasia, heterogeneity of, 70
— — — —, tumours, end-stage, metastasis in, 74
B lymphocytes, development of, 70
— — — —, differentiation, 1, 80
— — — —, recirculation of, 65
— — — —, role in hypogammaglobulinaemia, 5
BEVERLEY, P. C. L.: Functional subsets of lymphocytes, 59
Bleeding tendency in hyperviscosity syndrome, 87
Blood viscosity, factors affecting, 85
Bone marrow disorders and hypogammaglobulinaemia, 16
— — — —, early lymphoid precursors in, 49
BRESNIHAN, B., GRIGOR, R. R., and HUGHES, G. R. V.: Lymphocytotoxic antibodies in systemic lupus erythematosus: their clinical significance, 112
BROWN, D. L.: Complement activation profiles in disease, 116

Complement activation profiles in disease, 116
— deficiencies, inherited, 117
— — — —, macrophage and monocyte receptors for, 90, 92
— — — —, red cell lysis by, 90, 92
Crithidia luciliae test for anti-DNA antibodies, 109
Cytomegalovirus, effect on lymphocyte function, 41

Dengue virus, effect on lymphocyte function, 43
DENMAN, A. M.: Lymphocyte function and virus infections, 39
Deoxyribonucleotidyl transferase, terminal, and lymphocyte diversification, 55

Epstein-Barr virus, effect on lymphocyte function, 40
Follicle centre cell tumours, 73
FORD, W. L.: Distribution of lymphocytes in health, 63

GAGNON, R. F., and MACLENNAN, I. C. M.: Immunosuppression in established humoral responses, 126
Genetic control of antibody affinity, 120
— — — — restrictions in immune response, 30
Glomerulonephritis, mesangiocapillary, and nephritic factor, 117
Gram-negative septicaemia, 118
GRIGOR, R. R. See BRESNIHAN, B., GRIGOR, R. R., *et al.*

Haemagglutinin disease, cold, 93, 95
Haemoglobinuria, cold, paroxysmal, 92, 95
Haemolytic anaemia, autoimmune, warm, 93, 94, 95
— — — —, tissue specific autoantibodies in, 90
Herpes simplex virus, effect on lymphocyte function, 41
Histocompatibility complex, major, role in T lymphocyte function, 30
HLA antigens and disease susceptibility, 35
HOBBS, J. R. See RICHES, P. G., and HOBBS, J. R.
HOLBOROW, E. J.: Antinuclear acid antibodies, 107
HUGHES, G. R. V. See BRESNIHAN, B., GRIGOR, R. R., *et al.*
Hyperviscosity in paraproteinaemia, 85
Hypervolaemia and hyperviscosity syndrome, 87
Hypogammaglobulinaemia, late-onset, 6
— of infancy, transient, 15
— — — —, pathogenesis of, 5
— — — —, secondary, mechanisms in, 15

Immune complex diseases, 116
— — — —, role of antibody affinity in, 121
— — — — response, genetic restrictions in, 30
— — — — system, maturation of, 1
Immunodeficiency, 1–29
— — — —, combined, severe, 10
— — — —, types of, 26
Immunoglobulin deficiency in hypogammaglobulinaemia, toxic factors in, 18
— — — — G in hypogammaglobulinaemia, 15
— — — — — — — —, short survival of, 16
— — — — — — — —, macrophage and monocyte receptors for, 91, 94
— — — — — — — — M and direct red cell agglutination, 92
Immunoglobulins and antibody deficiency, 24, 25
Immunosuppression in lymphoid neoplasia, 19
— — — —, infection in, 26
— — — —, — — — —, prevention and treatment, 28
Immunosuppressive agents, effect on established humoral responses, 126

Infection in immunosuppression, 26
— — — —, — — — —, prevention and treatment, 28
Inflammatory disease, immunosuppressive agents in, 126
Influenza virus, effect on lymphocyte function, 43

JANOSSY, G.: Differentiation of lymphoid precursor cells, 48
JOHNSON, S. See ASHERSON, G. L., JOHNSON, S., *et al.*

KAY, H. E. M.: Infection of immunosuppressed patients, 26
Killer (K) cells, 92

Lupus erythematosus, systemic, lymphocytotoxic antibodies in, clinical significance of, 112
Lymphocytes, differentiation, 48–62
— — — —, distribution, 63–75
— — — —, — — — —, effect of antigenic stimulation, 66
— — — —, — — — —, in health, 63
— — — —, — — — —, relevance to human disease, 63
— — — —, — — — —, function, 30–47
— — — —, — — — —, effect of virus infections, 39
— — — —, — — — —, functional subsets, 59
— — — —, — — — —, migration from blood, mechanism of, 66
— — — —, — — — —, into skin, 67
— — — —, — — — —, residence in, effect on viruses, 44
— — — —. See also B lymphocytes, T lymphocytes.
Lymphocytic lymphoma, 71
Lymphocytotoxic antibodies in systemic lupus erythematosus, clinical significance of, 112
Lymphoid and myeloid systems, pluripotential and restricted stem cells of, 48
— — — — cells, malignant, distribution of, 70
— — — — — — — — neoplasia, antibody deficiency secondary to, 19
— — — — — — — — precursor cells, differentiation of, 48
— — — — — — — — precursors, early, in bone marrow, 49
Lymphoma, lymphocytic, 71
Lymphopenia and lymphocytotoxic antibodies, 114

Diseases of Connective Tissue

*The Proceedings of a Symposium organised by the
Royal College of Pathologists*

Edited by D. L. Gardner

The cells—Fibroblasts M. ABERCROMBIE ● Chondrocytes R. A. STOCKWELL ● Synoviocytes HONOR B FELL ● The muscle cell J. C. SLOPER, M. C. BARRETT, AND T. A. PARTRIDGE

Extracellular materials—Collagens D. S. JACKSON ● Collagen and elastin fibres A. J. BAILEY ● Basement membrane JOHN T. IRELAND ● Proteoglycans of cartilage HELEN MUIR

Disease mechanisms—Diseases of the collagen molecule C. I. LEVENE ● Molecular abnormalities of collagen F. M. POPE AND A. C. NICHOLLS ● Lysosomes and the connective-tissue diseases LUCILLE BITENSKY

Genetic disease—HLA system and rheumatic disease D. A. BREWERTON ● Replacement therapy in the mucopolysaccharidoses MICHAEL F. DEAN ● Genetic disease and amyloid J. R. HOBBS

Inflammation and fibrosis—Rheumatoid arthritis—a virus disease? A. M. DENMAN ● Systemic lupus erythematosus—an autoimmune disease? E. J. HOLBOROW ● Hepatic cirrhosis—a collagen formative disease? J. O'D. MCGEE AND A. FALLON ● Fibrosis of lung—an environmental disease? P. C. ELMES AND J. C. WAGNER

Kettle Memorial Lecture—Atherosclerosis—disease of old age or infancy? C. I. LEVENE

Structural and metabolic disease—New knowledge of connective tissue ageing J. D. SCHOFIELD AND B. WEIGHTMAN ● New knowledge of osteoarthritis S. YOUSUF ALI ● New knowledge of intervertebral disc disease J. BALL ● New knowledge of the pathogenesis of gout J. T. SCOTT ● New knowledge of chondrocalcinosis PAUL DIEPPE

A consensus—Connective tissue diseases: A consensus D. L. GARDNER

Price: Inland £6.00; Abroad US \$15.00, including postage

Payment must be enclosed with order or a surcharge of 30p will be made for rendering invoices and statements
