

# Fibrinolysis and its Inhibition

---

Symposium organised by  
The Royal College of Pathologists  
delivered in London in November 1979

---

Edited by  
J F DAVIDSON

Published for The Royal College of Pathologists by the  
*Journal of Clinical Pathology*, BMA House, Tavistock Square  
London WC1H 9JR England

£5.00

# Index

- Abortion, missed, antifibrinolytic therapy in, 57  
Acrosin, inhibition by fibrinolytic inhibitors for contraception, 78  
Aminocaproic acid. *See* Epsilon-aminocaproic acid  
Aminocarboxylic acids, 78  
—, mode of action of, 36  
Angioneurotic oedema, hereditary and non-hereditary, antifibrinolytic therapy in, 77  
Antifibrinolytic therapy, basis of, 35  
—, future prospects for, 77  
—, in gastrointestinal haemorrhage, clinical trials of, 66  
—, in genitourinary tract surgery, 60  
—, in gynaecology, 55  
—, in haemophilia, 50  
 $\alpha_2$ -Antiplasmin, 1, 24  
—, and regulation of fibrinolysis, 25  
—, assay with chromogenic substrates, 48  
—, congenital deficiency of, 3  
Aprotinin, 36, 79  
—, mode of action of, 37  
ASTEDT, B.: Adjuvant treatment of ovarian carcinoma with tranexamic acid, 74  
  
Benzopiperidine derivative, new, inhibiting thrombin, 79  
Bleeding due to excessive fibrinolysis, classification of, 37  
—, fibrinolytic, local, EACA and AMCA in, 45  
—, —, —, within organs, 39  
—, in pregnancy, antifibrinolytic therapy in, 57  
—, postpartum, secondary, antifibrinolytic therapy in, 57  
—, problems, endothelial plasminogen activator in, 19  
—, *See also* Gastrointestinal haemorrhage; Menstrual bleeding  
Blood activator of plasminogen, 21  
—, gastric, fibrinolytic activity in, 63  
—, plasmin inhibitors in, 24  
—, plasminogen inhibitors in, 27  
BONNAR, J., GUILLEBAUD, J., KASONDE, J. M., and SHEPPARD, B. L.: Clinical applications of fibrinolytic inhibition in gynaecology, 55  
  
Cadaveric activator of plasminogen, 21  
Carcinoma, ovarian, adjuvant treatment with tranexamic acid, 74  
Caseinolysis, effect of EACA, 36  
Chromogenic substrates in assessment of plasmin inhibitors, 48  
Coagulation disorders, hereditary, 39  
Coagulation-fibrinolysis balance, hypothesis of, 2  
COLLEN, D.: Natural inhibitors of fibrinolysis, 24  
Complement activation in SLE, blocking by plasmin inhibitors, 77  
Contraception by inhibition of acrosin with fibrinolytic inhibitors, 78  
  
DAVIDSON, J. F., and WALKER, I. D.: Biological role of fibrinolysis, 1  
Dental extractions in haemophilia, antifibrinolytic therapy for, 52  
  
Endothelial activator of plasminogen, 18  
Epsilon-aminocaproic acid, 36  
—, clinical pharmacology of, 41  
—, effect on caseinolysis, 36  
—, —, on fibrinolysis, 37  
—, in genitourinary tract surgery, 60  
—, pharmacokinetics of, 41, 50  
—, toxicology of, 44, 50, 58  
  
Fibrin and fibrinogen breakdown products, molecular mechanisms and clinical implications, 10  
—, breakdown products, practical implications of, 14  
—, cross-linked, 12  
—, exogenous, lysis of, prevention by fibrinolytic inhibitors, 78  
—, formation in intravascular coagulation-fibrinolysis syndrome, 31  
—, non-cross-linked, 11  
—, role in fibrinolysis, 1  
Fibrin-plasmin breakdown products, 10  
—, interactions, 11  
Fibrinogen fragmentation mechanisms, 10  
Fibrinolysis, activation of, 2  
—, and gastrointestinal haemorrhage, 63  
—, and menstruation, 55  
—, biological role of, 1  
—, congenital abnormalities of, 3  
—, effect of EACA, 37  
—, excessive, haemorrhage due to, classification of, 37  
—, —, secondary to DIC, 38  
—, in intravascular coagulation-fibrinolysis syndrome, 32  
—, inhibition of, physiopathological conditions associated with, 27  
—, inhibitors of, in treatment. *See* Antifibrinolytic therapy  
—, molecular interactions in, 1  
—, natural inhibitors of, 24  
—, primary, 38  
—, regulation of, and  $\alpha_2$ -antiplasmin, 25  
—, synthetic inhibitors of, 78  
—, —, —, clinical effects of, 27  
—, —, —, mode of action of, 35  
—, systemic, EACA and AMCA in, 45  
—, therapeutic possibilities in, 3  
Fibrinolysis-coagulation balance, hypothesis of, 2  
Fibrinolytic activity in gastric blood, 63  
—, —, —, tissue and juice, 64  
FODSTAD, H.: Tranexamic acid (AMCA) in aneurysmal subarachnoid haemorrhage, 68  
  
GAFFNEY, P. J.: Breakdown products of fibrin and fibrinogen: molecular mechanisms and clinical implications, 10  
Gastric blood, fibrinolytic activity in, 63  
—, tissue and juice, fibrinolytic activity in, 64  
Gastrointestinal haemorrhage and fibrinolysis, 63  
—, —, antifibrinolytic therapy in, clinical trials of, 66  
Genitourinary tract surgery, antifibrinolytic therapy in, 60  
Glycosaminoglycan polysulphates of bovine origin, 79  
GUILLEBAUD, J. *See* BONNAR, J., GUILLEBAUD, J., *et al.*  
Gynaecology, antifibrinolytic therapy in, 55  
  
Haematuria, antifibrinolytic therapy in, 51  
—, EACA and AMCA in, 45  
Haemophilia, antifibrinolytic prophylaxis in, 51  
—, —, therapy in, 50  
—, —, —, during surgery, 52  
—, —, —, for dental extractions, 52  
Haemorrhage, subarachnoid, aneurysmal, tranexamic acid in, clinical trials of, 68  
—, *See also* Bleeding  
Hyperplasmaemia, 38  
  
Inflammation, endothelial plasminogen activator in, 20  
Intrauterine devices, menstrual bleeding and fibrinolysis with, 56  
Intravascular coagulation, disseminated, excessive fibrinolysis secondary to, 38  
—, coagulation-fibrinolysis syndrome, clinical aspects of, 32  
—, —, —, pathophysiology of, 31  
—, —, —, treatment of, 33
