

The Pathology of Trauma

Symposium organized by
The Royal College of Pathologists
and delivered in London in February 1970

Edited by
S. Sevitt and H. B. Stoner

Published for The Royal College of Pathologists by the
Journal of Clinical Pathology, BMA House, Tavistock Square,
London WC1H 9JR England 1970

FORTY SHILLINGS
(£2.00)

COPYRIGHT © 1970 by The Royal College of Pathologists

The Journal of Clinical Pathology is published nine times a year by the British Medical Association, from BMA House, Tavistock Square, London. It is edited by A. Gordon Signy.

Index

- Accidents, causation and incidence, 1
- Acidosis, problems of, 73
- ADAMS, J. H.: Head injuries (*Discussion*), 176
- Adipose tissue injury and fat embolism, 132
- Adrenal function, effect of acidaemia, 73
- Albumin, labelled, studies of catabolism in paralysis with, 61
- synthesis with ¹⁴C carbonate method in injury, 62
- Amino acids, ¹⁵N-labelled, studies in injury with, 62
- Arterial thrombosis after injury, 99
- Autonomic disturbances in head injury, 185
- Axon damage in head injury, 159, 170
- Blood coagulability changes and fat embolism, 138
- coagulation and fibrinolysis after injury, 102
- changes after haemorrhage and injury, significance of, 110
- , intravascular, disseminated, and endotoxic shock, 13
- , relation to thrombosis and embolism after trauma, 84
- electrolytes, measurement in shock, 39
- , fat macroglobulins in, 137
- flow, cerebral, in haemorrhagic shock, 204
- gas measurements in shock, 39
- volume measurements and transfusion in shock, 33
- Body water. *See* Water
- Bone-marrow injury and fat embolism, 132, 135
- Brain damage, ischaemic, secondary, after head injury, 160, 168, 172, 176
- , functional 'life' and 'death', EEG assessment of, 198, 199
- , necropsy appearances in fat embolism, 149
- stem haemorrhage, primary, 154
- — lesions after head injury, 154
- — — in deaths from extra-cerebral causes, 163
- — —, primary, delayed changes from, 159
- — —, secondary, after tentorial herniation, 155
- tissue, biochemical changes after body trauma, 202
- , *See also* Cerebral
- Burns, protein metabolism after, 56
